

The Isthmian Theatre

"Sleep Walker"..... Vitagraph
A story of a somnambulist who would steal in his sleep, being unjustly accused, came near to punishment, but by careful watching of an admirer escapes and wins a mate for life.

"Indian's Sacrifice"..... Lubin
Elk, the son of the medicine man, goes through Carlisle college, becomes civilized, and loses all love for the manners and customs of his people. Still he is not a white man and makes no close friends among his white brethren. His life is all sacrifice.

"Over the Cliff"..... Pathe
A dramatic story dealing with a mountebank, and his wife and their house on wharfs.

"Max Comes Home"..... Pathe
We all know Max, and his home coming is sure to be of a most joyous nature.

Song—"If I Were King" sung by C. F. Ferrin.

Uncle George Webb, ex-state treasurer, and his daughter, Mrs. Frank Frazier of Pendleton, are visiting in La Grande at the home of Mr. and Mrs. Jap H. Stevens. Mr. Webb is Mrs. Stevens' father.

NEW GUNS ARE POWERFUL ONES

CALIBRE MISSILES FIFTEEN MILES WITH ACCURACY.

A Dozen Shots Would Level New York—One Would Loin a Warship.

Washington, Aug. 17.—Apparently there is no limit to the range of the big guns on Uncle Sam's ships and coast defenses. A few years ago a gun which could shoot accurately a distance of 10 miles was considered remarkable, but the latest acquisition to Uncle Sam's armament will demolish any battleship or fortification now in existence at a distance of 15 miles.

When it is considered that during the civil war, only 50 years ago, two miles was the greatest range possible with the guns in use at that time, the range of the new 14-inch death-dealers seems phenomenal.

These new guns will be mounted on the largest of the new battleships, the Texas and the New York, both of which are of the Delaware type, and these guns will make these two ships the most powerful and the most to be dreaded in the world. The new gun is 53 feet, six and one-half inches long, and weighs, stripped, 63.3 tons. The diameter at the breech is 47 inches and at the muzzle 24 inches. Each one will cost \$74,770, and the carriage upon which the gun is mounted will add \$50,000 to this price.

At the muzzle the gun has a velocity of 2,600 feet a second and the power behind the projectile will drive the latter at a rate of eight miles in 25 seconds. The penetrating power of the 14-inch monster is 12 inches of the best face-hardened steel at eight miles; 11.3 at 10 miles; 10.7 at 12 miles and nine inches at 15 miles. The projectile weighs 1,400 pounds, is 51-2 feet in length and costs \$450. It is loaded with a bursting charge of 45 pounds of "dunnite," the most powerful explosive known. The powder charge used behind the projectile to give it velocity consists of four bags of 90 pounds each of smokeless nitrocellulose.

The cost of these guns at first appears immense, but when it is considered that, far over the horizon, one shot from one of these monsters very likely would batter and possibly destroy any battleship now afloat and that a single round from ten of them sufficient to lay New York in ruins, the primary cost does not appear so great.

The federation of trade unions connected with the building industry in France has decided the bodies which form it shall no longer take part in any building operations connected with prisons.

COMBINE BUSINESS WITH PLEASURE

Enjoy an Outing at the Seashore.—A Stopover at Portland.
