MANY SONG HITS IN "THE SWEETEST GIRL IN PARIS."

Rarely does a musical play contain anywhere near as many conspicuous ensemble and elaborate stage song hits as does "The Sweetest Girl in Paris" which will be seen at the Steward Opera House, Monday, Oct. 16 and the original cast and chorus that captivated Chicago during its seven months run at the La Salle opera house last season. It cost a great deal of money—to say nothing of pains and inventive ingenuity—to make a musical comedy complete with bewitchingly produced numbers, and that is why one or two novel effects are generally compelled to counterbalance numerous solos and duets, wherein the chorus is kept in the background.

Not so, however in the "Sweetest Girl in Paris," which contains at least a dozen elaborate stage songs to say nothing of the sufficient quota of clever individual hits in the way of vocal efforts.

Estray Notice.

A band of 300 sheep found on the Sawtooth of the Big Sheep on the Big Minam river, found by J. and H. Haffer, are now at Cove where the owner can identify the same and pay charges. The sheep are branded with an O with parallel lines crossing it.

Tons of Fish Caught In Lake Drained to Make Big Reservoir

Photos by American Press Association.

FISHING under favorable circumstances was enjoyed by members of the Daniel Gray Fishing club of White Plains and the Mount Kisco Gun club at Lake Kensico, Westchester county, New York, when the aqueduct commission recently drained the lake in order to construct a dam that will enlarge what was merely a large pond into a body of water thirty miles in circumference. After most of the water was drained off it was found that there were tons of fish in what remained. Members of the clubs got permission from the aqueduct commission, and under the direction of fish and game wardens the fish were caught in seines and those of value were taken in tanks to nearby streams and ponds and released. Black bass that weighed eight or ten pounds were thus moved, and pickered nearly as heavy were also transported to their new homes. Suckers, shiners and other worthless fish, or those of little value either as food or as sport for expert fishermen, were rejected and were permitted to die in the mud. Automobiles were in readiness for moving the fish, and they were released with only three fatalities, and they were big pickered which succumbed to the lack of air while confined in the small tanks in transit. Catching and moving the fish took all one day. The pictures above show the catching of the fish and the way they were dumped into the waters that will be their future homes.

It's the sign, to those who want REAL leaf lard, that the palladium is in it. The law doesn't allow these words on a label unless there is leaf lard in the pall. So, to be sure, just look for this label. It costs but a trifle more than the ordinary, but you use two thirds as much of it.
