Eye Troubles Are Hereditary

Eye troubles are caused largely on account of the improper FORM of the eyeball. The shape of the eyeball is inherited as are all other physical features as the nose and mouth. If you have eye troubles, your children are more than likely to be affected similarly.

RED LIDS, STYES,

Itching Lids, Aversion to Study and Listlessness are sure signs of eye trouble in children.

We relieve such troubles with glasses.

Loans Without Interest. In the city of Barcelona, Spain, there is a peculiar pawnbroking establishment bearing the dainty name of "Our Lady of Hope" where loans are made without interest to necessitous persons on the deposit of any articles in pledge. Two-thirds of the value of the deposit is at once advanced, and the loan is made for six months and a day, but if at the expiration of that period the depositor should declare himself unable to redeem it, after another period of six months the pledges are sold, but if they yield more than the amount advanced the difference is given to the original owner. This institution is very popular. Thousands are every year suitors for the favor thus afforded by "Our Lady of Hope."

Richard Ford, "Gatherings From Spain."

Another Miss.

A young recruit was just commencing his first course of musketry. The instructor, getting very angry with him, told him exactly what to do, and each time he missed the target. At last the instructor lost his temper and told him to take a spare round behind the butts and shoot himself with it. Presently the instructor was startled by hearing a report from a rifle behind the butts; without a moment's hesitation he rushed round to see what had occurred, when the recruit looked up from examining his rifle and said quite coolly, "It's all right; don't get alarmed; it's another miss."—London Telegraph.

Very Much So.

"Miss Gwendolyn is a very superficial sort of girl, with her head filled with fine clothes and making herself pretty. I don't suppose she gives a moment to self reflection."

"Doesn't she? Just watch her when a mirror is anywhere in sight!"—Baltimore American.

Rackets.

An Italian woman was asked in court if she had any musical instruments in her home.

"No, signor," she replied, "nothing but rackets."

"What?" queried the lawyer.

"Rackets—the things they put in graphophones."
