## How Little Things Count

Here is a Dime. Save it. Not a large amount, you say? No, you're right, yet it represents ten per cent. interest on one dollar for a year. It's the little things that count in this life. History tells us that the Duke of Wellington attributes the victory of the Allies at Waterloo to the closing of the Hugomont Castle gates by James MacDonnell and John Graham. It was a small thing. But the results have been marvelous as we look back over the intervening years. Philip D. Armour knew the value of little things. They say he packed everything but the last breath of a hog—utilizing the waste in the manufacture of by-products made him wealthy. The small boy by sticking his finger in the leak in the dam saved Holland from devastation. A few drops of water on a stone make no impression—the constant drip wears away the stone. The little point on the auger prepares the way for the large bored hole. A single grain of corn produces from one to two perfect ears. And so the LITTLE DIME is a part of a dollar. Dollars at interest produce dollars just as surely as the seed sown on rich ground brings forth an abundant harvest. Then save the DIME. Watch it grow.
