**PENINSULAR STEEL RANGES**

Is Far and Beyond an argument.

The **FINEST MADE.** Here is what a **SATISFIED CUSTOMER** writes us:

"The day I first began using my new **PENINSULAR STEEL RANGE** was indeed a revelation to me. The possibilities of quick and even baking are unlimited. On baking day my bread is that same delicious, delicate brown on both the top and bottom. At the same time I cook my meals on the top and heat water 'piping hot' for washing the dishes in the large porcelain lined reservoir tank. And do you know, that when I have a boiled dinner that I cook it in the **OVEN**, because it carries the odors into the chimney and out of the house. Isn't that **GRAND!** When I am baking I never have to fire but once, as it will hold an even fire all day. I have framed my **GUARANTEE BOND** given with the range and hung it in the kitchen, but know that I will never find it necessary to have use for it."

**A Little Sermon on Health**

AN ADVERTISEMENT, NOT BY ELBERT HUBBARD.

Ask your doctor the most important thing toward keeping "fit," and he will say, "breathe plenty of fresh air—sleep with your windows open."

Ventilation is absolutely necessary in any room where people live. The air must be kept pure and free from contamination, and the quantity of oxygen must remain normal. Otherwise, the rooms feel "close" and "stuffy" and discomfort, headaches and often more serious things are the result.

Anything that destroys or contaminates the oxygen in the air you breathe is a menace to your health. Kerosene lamps, for instance. Try this: Close your windows and light a kerosene lamp; go out and shut the door; come back in half an hour; notice how "close" and "stuffy" the room feels—how difficult it is to take a long breath. The lamp has burned up the oxygen in the air and has given off a poisonous gas.

Oxygen is the element in the air that supports life, and we require a given amount of it every time we breathe.

Now try the same test with an electric light. The air remains pure and wholesome because the electric light burns in a vacuum.

Nothing then, nothing but an electric light should be used in the living room, the bedrooms, or the sick room.

When people realize this they are not going to be satisfied with kerosene lamps. We are doing our part by making a very low rate for electricity. For complete information phone Main 43.
