The safest, quickest and most scientific method used for fitting Glasses is OPTOMETRY.

OPTOMETRY is the art of properly fitting glasses without using DROPS in the eyes.

In the practice of OPTOMETRY there is:

- No LOSS of vision for near objects.
- No blurring of the eyesight for distant objects.
- No dryness of the THROAT and DIZZINESS experienced.
- No PARALYSIS of the eye-muscle controlling near-vision.

No possibility for future weakness of the eye muscle to manifest itself.

No discomfort and inconvenience while awaiting the subsidence of the effect of the POISONOUS DROPS in the eye.

The scientific practice of optometry is devoid of all those manifestations which will always follow, at least in part, the instillation into the human eye of PARALYZING POISONOUS DROPS.

The use and abuse of DROPS in the eyes is practiced by those fitting GLASSES, who DO NOT or WILL NOT comprehend and practice OPTOMETRY.

We use only the latest scientific methods.
