If You Ride

You Ride In Comfort

The wonderful little ball-bearing motor of "The Flying Merkel" is the most powerful for its size made. Being unusually flexible it can, by a simple turn of the wrist, be throttled down to five or sped up to from fifty to seventy miles an hour, according to the model. Perfect and absolute control of the machine under all conditions is further made possible by a Free Engine Clutch—a device similar in its operation to the clutch of an automobile. This Free Engine Clutch makes it possible for "The Flying Merkel" rider, when threading the traffic of city streets, to stop his motorcycle without stopping his motor. It also is of great assistance in negotiating sandy roads and in starting on a hill. The latter being practically an impossible performance without a Free Engine Clutch.
