You are crowding more into a year now than the individual put into ten years a short time ago. That means that you must prepare your entire makeup for the strain.

Your manner of taking care of the digestive apparatus has not improved commensurately with the strain placed upon it. It is time to wake up and give this matter more attention. Would you expect a grain separator to do the proper work with a third of the teeth missing from the cylinder? Would there be a loss of efficiency? Apply it to the human body and see where you are.
