

# PROGRESS

---

Every effort that we make is for Constructive purposes--nothing to Destroy or Obstruct. We believe in the continued and rapid progress of La Grande and the development of her resources, and we are doing our share of the work. We are opening and grading Washington Avenue all the way from the end of the new asphalt paving (right at the head of Connordale Addition) to the County Road. We are grading and planting the parking strips of Connordale with grass, trees and shrubs. We are building and improving and growing. We are too busy to criticize, get in the way or lay back in the traces. We do not believe that "the country is going to the dogs," as the calamity howlers would have us believe. We know that La Grande is the best town we have ever seen in the Northwest or any other part of the country, and a good many other people feel the same way about it. If Everybody felt that way and went out and told about it, the population of La Grande would double in a year. La Grande is leaping ahead. Hundreds of new houses have been built recently. Real estate any place in town is a good investment. This is especially true of Connordale on account of its fine location, closeness to center of town, city improvements and building restrictions, added to the fact that when Washington Avenue is finished it will be reached by an asphalt street. Whatever you do
