at the propaganda. The rector has won the admiration and commendation not only of the various cardinals with whom he comes in contact, but especially the heads of the various congregations, of the cardinal secretary of state and of the holy father. All those acquainted with what is going on in high vatican spheres know that Bishop Kennedy is persona gratissima at headquarters and that he is considered to deserve a high distinction but he remains rector of the American college, it is said, chiefly to gratify the desire of the pope that he should remain longer than any of his predecessors at the head of the institution.

Walla Walla, July 25.—By a batting rally the Pippins came up from behind in the eighth yesterday and secured a two run lead only to lose out when in the last half of that frame the Bears registered three runs and won out 9 to 8.

Both Fitchner and Bridger had the poorest kind of control, the former issuing nine passes, while Bridger was only one behind. In the last of the eighth with the Pippins two ahead and one Bear dead, Childers singled and Johnson walked. At this juncture Melvor replaced Fitchner and passed Thompson. Davis struck out but Childers stole home on the third strike. Brown then hit right for two bags, registering Johnson and Thompson and putting the Brown tribe back in the lead.

In the ninth Kelly replaced Bridger and held the visitors helpless. With one dead Esola got on through Davis' error and purloined second. Barry fanned and Luttrell fouled out to Childers ending the game.

C. Harmon, the Walla Walla center fielder, was hit on the left elbow by the first ball that Fitchner pitched. He had to retire from the game.

THE LAND OF DARKNESS

An Excellent Two Reel Eclair Feature, Will Be Exhibited at Sherry's Wednesday and Thursday.

"The Land of Darkness" is a drama in which a coal mine disaster provides the big scenes, all of which were photographed at the great Belgian collieries.

The story centers on Claire Uenoir, a young girl, left an orphan, but committed by her dying mother to the care of a widowed aunt, who lived with her son Louis, a workman in the mines. Claire was welcomed to her new home and her cousin was deeply impressed with her charms. A rival soon springs up in Charles Macourt, a miner and close friend of Louis. Jealousy springs up between the two friends and they become bitter enemies, which later results in a fight in the depths of the mine. In the struggle, one of the miners' lamps is broken and a terrible explosion ensues.

The principals in this excellent feature of 200 people include Cecile Guyon, of the Renaissance theatre, Paris; M. Vibert and M. Iabel, of the Post St. Martin's theatre, Paris, and Charles Krause, of the Sarah Bernhardt theatre, Paris, and makes one of the strongest pictures of the year. This, together with "His Message," by the Bison company and "Why Tour signed the Pledge," and "The Night Clerk's Nightmare," by the Thanhouser company and vocal solo by Herbert Crawford, entitled "My Gal Sal," makes a strong, well balanced and entertaining program.

Contributions Are Discussed.

Washington, July 25.—George Sheldon, treasurer of the republican national committee in 1908, testified today before the senate probing committee that Henry Clay, Frick and Morgan had contributed to the fund that year. He testified that over a million and a half were contributed to the republican campaign fund.

POWDERITES COMING.

Moose Will Lock Horns With North Powder Squad Next Sunday.

North Powder is coming to La Grande next Sunday, with her strong aggregation that earlier in the year raised Cain with the Eastern Oregon league clubs, to play the La Grande Moose. The local Moose have added to their force Hooper, the hard hitting Elgin man and Patten, a well-known Elgin first baseman, who hits well too.

STANDING UPRIGHT.

Easy Only Because of Our Complex Muscular Mechanism.

We are so accustomed to standing upright as a natural attitude that few of us think what a special complex mechanism is required for this purpose. A moment's consideration will show that the ordinary explanation of the erect position (the center of gravity to be directly above the feet) is insufficient. When a man is suddenly shot, whether from the front or behind, he drops on his face, for the truth is that there is much more weight in the front of the spinal column than behind it.

The fact is that when we are standing a large number of powerful muscles (both front and back) are simultaneously at work, the effects of their action being to neutralize each other. Thus the legs would fall forward were it not that they are kept vertical on the feet by the strong tendon (the Achilles) at the back of the heel. At the same time the muscles of the thigh are tightened so as to prevent taking a sitting position, and the muscles of the back are pulled taut so that the trunk does not snap forward. The head is prevented from dropping on the chest by the ligaments in the nape of the neck.

That the upright is not its normal position is easily shown by the fact that a man nods as he is falling asleep, for as soon as the controlling nervous force is diminished the head drops forward by its own weight, only to be pulled back into position again with a jerk when the brain becomes suddenly aware of an unusual attitude.

Rivers and a Mountain Range.

The range of the Blue Ridge mountains in Pennsylvania is divided by a river every twenty-seven miles, as follows: From Susquehanna to the Swatara, twenty-seven miles; from the Swatara to the Schuylkill, twenty-seven miles; from the Schuylkill to the Lehigh, twenty-seven miles; from the Lehigh to the Delaware, twenty-seven miles. At the next twenty-seven miles is a hollow of New Jersey, in which nestles a lake known as Culvers pond.

Maybe It Was Accidental.

Pastor Goodsole had just preached a sermon on "Gossiping." It may have been, therefore, wholly unintentional that he gave out the first stanza of the closing hymn in this wise:

Blow ye the trumpet, blow The gladly solemn sound Let all the neighbors know To earth's remotest bound He looked preternaturally solemn, and there wasn't the slightest flicker of an eyelash. Chicago Tribune

A Sample.

"Why did you cover that burg with paint and lead it against your gate-post?" "That," replied Mr. Growcher, "is a sample for the benefit of the people who won't believe paint is fresh until they have rubbed their fingers across it."—Washington Star.

True to Life.

"What success have you had with the portrait of your mother-in-law?" "Tremendous. It is such a speaking likeness that my brother, when he came to look at it, instinctively put his cigar behind his back."—Pittsburg Blatter.

May Split Mine Workers.

Terre Haute, Ind., July 25.—An important convention of the Indiana locals of the United Mine Workers of America assembled here today. The purpose of the convention, as set forth in the call for the gathering, is to consider the advisability of refusing to pay the international tax and to determine who is responsible for the action of the scale committee at the Cleveland interstate conference last spring by which the Indiana miners could not insist on their demand for

the weekly pay day as provided by the Indiana law. The possibility of the Indiana miners, seceding from the national organization in the event that their demands are refused is being freely discussed, but it is not considered likely that the convention will decide upon taking such an extreme step.

No Immunity for Becker.

New York, July 25.—John Reissler was one of the first witnesses before the grand jury today, investigating the Rosenthal murder. He testified that he saw Webber running away from the scene after the gambler was shot. Lieutenants Becker, Costigan, and Reilly were invited to testify before the grand jury, but the district attorney stipulated that Becker must waive his rights of immunity. The coroner's inquest was set for Monday.

Wants Facilities to Handle Big Crop.

Calgary, Alta., July 25.—Representatives of the grain growers and commercial interests of Alberta appeared before the dominion railway commission sitting here today and presented a formidable array of figures in support of the demand for increased railway and elevator facilities for handling the wheat crop this year. Alberta expects another bumper crop this year and it is desired to avoid the car congestion which resulted in a costly delay in moving last year's crop to the eastern markets.
