"HOMELESS HUBBY" CLUB.

Men Whose Families Are In Country, Form New Organization.

New York, Aug. 14.—To his already long list of social organizations, Father Knickerbocker has now added one more which is said to be unique in the history of the city if not of the whole country. This is the "homeless husbands" club. It has been created by a number of men who, while their families are in the country, are forced to remain in the city, but who do not care to keep open the lonely house or apartment. Of course, these homeless men are all members of many clubs at which they might live.

But this the homeless ones have found a drawback, since when one of them wishes to find another homeless friend it is frequently necessary for him to search through eight or a dozen clubs to locate him. Accordingly these summer widowers, acting perhaps on the theory that misery loves company, got together and leased two complete floors in one of the city largest and newest hotels. Each member will have a suite to himself and while from the nature of things it is expected that the occupants of the reserved floors usually will be men, there is nothing in the regulations to prevent a man from having the women members of his family stop with him if they chance to be in town over night. There is pantry service on each floor and a large suite is to be reserved for dining rooms.

A suite on the corner of each floor will be reserved for lounging purposes and later on it is likely that billiard tables and other usual club paraphernalia will be introduced. The popularity of the new club is evidenced by the presence on its board of governors of many of the city's noted men.

LEXOW INVESTIGATION REVIVED.

New York on Verge of Political Upheaval Is Believed.

New York, Aug. 14.—That New York may be on the verge of a great political upheaval is one of the most interesting points now being discussed in connection with the Rosenthal shooting here, in which a gambler on the eve of furnishing the district attorney with evidence which he claimed would involve the police in a scandal with the gamblers was coolly put out of the way in the heart of the city.

Even staid New Yorkers are forced to admit the presence here of bands of hired assassins who will do anything with any designated victim pro-

vided their price be paid. The political significance of the murder is at present confined to speculations as to what the result will be if District Attorney Whitman is actually able to bring the murderers to justice and in so doing develops complicity between the police, the gamblers and the hired murderers.

Such a result would cause the greatest airing of dirty political linen since the days of the Lexow committee and it is believed would make Mr. Whitman the logical republican candidate for the governorship of the state. In this connection it is pointed out that the conditions revealed by the Lexow investigating committee which laid bare an almost unbelievable state of corruption resulted in the swinging of the state from the democratic party, which was then in power to the republican lists resulting in a success-
