### YOU NEVER READ AN ADVERTISEMENT LIKE THIS—IT'S DIFFERENT.

A recent issue of a ladies' magazine has an article on "scientific house-keeping" in the most modern home in the world.

This lady has reduced housekeeping to such a science that she is able to do all the work for a family of six, keep a fourteen-room house in order and still have abundant time for other things.

How does she do it? We can't tell all the story here, but we ask you to read the article, if you have not already done so. Practically every known labor saving invention is used in this home, and at least 80 per cent of them operate by electricity.

The modern woman owes much of her comfort to electricity. There are electric devices for nearly every household need, and they are all labor savers. There are electric appliances for washing, ironing, cooking, dish washing, heating water, sweeping, etc. The list includes scores of practical time and labor savers.

This advertisement is not written to sell our goods, but to bring to your notice the many marvelous uses of electricity. We carry a very complete line of electrical goods, however, and will gladly order anything not kept in stock. Our line of electric plates, ranges, irons, etc., will appeal to your comfort these hot days.
