### RACE DETAILS SATISFY HEADS

J. A. WADDELL BRINGS FAVORABLE REPORTS

Pavilion at Fair Grounds Under Construction—Barns Are Ready.

Additional details pertaining to the

coming race meet when the Oregon-Idaho racing circuit is opened at the La Grande track during the week of the county fair, were discussed last night at a meeting of the directors of the local meet and J. A. Waddell, secretary-manager of the Baker club, where the horses go after the races here. Mr. Waddell brings encouraging reports from all corners of the circuit and it looks like a tremendous success all around. He was equally well pleased with prospects for the local race meet.

Various matters of importance to the fair in general were gone over by the directors at the meeting last

evening.

#### New Building Immense.

Barns housing race horse box stalls have been completed at the grounds and workmen are today employed on the big pavilion. The pavilion, built for permanency, is 60x100 feet, provided with a large balcony and a complete and unobstructed floor space. It is so arranged that it can be added to at any time it is desired.

#### Many Stalls for Horses.

The race horse barns provide 120 box stalls for the track animal, but in addition to that there are 200 cattle and horse stalls for fair week, 50 stalls for stallions, and sufficient hog and sheep pens to accommodate all that may wish to exhibit.

#### Water Piped to Grounds.

All departments of the grounds have ample water supply, pipes having just been laid.

Electric light wires and poles are being arranged to properly light the grounds and buildings.

#### Advertising Is Exhaustive.

After an extended campaign of personal advertising the fair is now being "posted" in all cities and towns of this, Wallowa and Baker counties. Big posters have been swung to view by men under direction of Secretary A. B. Cherry, all but a few districts having already been covered and men now in the field completing the work.

### EXCURSION TO COAST POPULAR

#### SUDDEN BREAK OF COLD SNAP HELPS.

Believed Last Hour Will See Many Ready for Popular Trip.

Tomorrow night at 8 o'clock the La Grande special leaves for the seashore and while the list of berth reservations at this time is not large, it is believed the full capacity of accommodations will be taken up. The spell of warm weather following the cold snap has added to the list of those going. There will be two tourist sleep-

ers, one standard and two coaches out of here, and the Wallowa delegation will take sleepers out of here, too.

The trip to the coast has become an annual event and invariably is well attended.

### FIGHT AGAINST PEST EXPLAINED

#### EXPERT TO GIVE A PUBLIC DEMONSTRATION.

Date Is Announced as Tuesday, the 27 of This Month.

Plant pathology, including the scientific manner in fighting diseases in orchard trees, will be handled in a public demonstration in some orchards to be named shortly by Prof. H. S. Jackson of Oregon Agricultural college. Ralph D. Hetzel, director of the extension society, has written to the Commercial club here asking that publicity be given the demonstration. Prof. Jackson will arrive in La Grande on Tuesday, the 27th and arrangements for a public demonstration will be made. He will go into an orchard to demonstrate to his hearers the best way to fight orchard diseases. Tuesday is circus day and Secretary A. B. Cherry has written to Mr. Hetzel trying to have the meeting day postponed one day so that this highly important matter can be participated in and instructions derived by the greatest number of people on the day it occurs.

#### Birth Record.

Born to Mr. and Mrs. H. Dray, Aug. 5, a son.

Born to Mr. and Mrs. Charles S. Woodell, of Summerville, a son, Aug. 5th.

Born to Mr. and Mrs. E. H. Hoke, a boy, August 14.

Born to Mr. and Mrs. M. R. Lester, twins, a boy and a girl, Aug. 18.

Born to Mr. and Mrs. Jno. G. Wright, a girl, on Lower Cove, Aug. 19.

Born to Mr. and Mrs. W. C. Green, Aug. 19, a boy.

#### ZINC SMELTING.

Not a Modern Art, Since It Was Known as Early as 1798.

For many years the art of zinc smelting was supposed to be relatively modern among metallurgical processes and to be due to the invention of the Abbe Daniel Dony, a chemist of Liege, the story of whose accidental discovery in 1805 is classical.

The particular type of Belgian furnace may indeed be credited to Dony, but it has long been doubtful whether he was entirely unacquainted with previous undertakings. Thus it is well known that the manufacture of spelter was begun in Upper Silesia about 1798-1800 by Johann Rubberg, who learned the art in England (where zinc smelting was then being carried on by the English process of distillation downward) and Bergrath Dillinger began zinc smelting in Carinthia in 1799.

As remarked by Ingalls in "Production and Properties of Zinc": "It is incomprehensible indeed that ten years later there should have been no knowledge in Belgium of what was being done in this branch of metallurgy in England, the two countries being separated only by a narrow strip of water, while the news had previously penetrated eastward to the Polish frontier."—Engineering and Mining Journal.

#### MAKING CLOUD PICTURES.

Some Useful Hints That May Help Amateur Photographers.

Your cloud picture depends largely upon your choice of a subject. Rivers and small lakes, mountains and hills lend the best contrast, while trees in the immediate foreground come next. Wide expanses of level lands or vast stretches of water are unsatisfactory. If you desire an ocean cloud effect be sure to place a cliff or some prominent landmark in the foreground to break the monotony.

The exposure for cloud effects, made necessary by the laws of light and optics, is necessarily very rapid. Anomalous as it may seem, this does not presuppose an extra rapid lens. In fact, such a one may defeat the very object you hope to attain. I make my cloud scenes with an ordinary rectilinear lens by preference. The exposure with an eight stop should be the maximum speed of the ordinary shutter. If the day is exceedingly brilliant the stop must be correspondingly decreased. The great danger is in over exposure, thereby dissolving your cloud.—Charles Stuart Moody in Outing Magazine.

### EXPLOSION HURTS MEYERS

LA GRANDE BANK CASHIER HAS A NAERBOW ESCAPE.

Accumulated Gas From Auto Lamps Burns His Face Badly.

Escaping what might readily enough have been a most serious accident, with a badly burned face, from which recovery will be speedy, F. L. Meyers, cashier of the La Grande National bank, and ex-mayor, underwent a painful accident last evening. He had returned from a drive in his machine and turned out the lights after running his car into the garage. Later he decided to return down town and proceeded to generate the gas for his lamps. The generation was no doubt too severe and surcharged the atmosphere with the explosive gases. When he struck the match to relight his lamps the explosion occurred, though the lamps did not break as first rumored today. His physician claims the cashier will be able to be out of doors tomorrow or the day after and has found that burns will leave no serious wounds and have not injured the eyes beyond a severe burning of the lashes and slight inflammation following. Although probably not lasting the burns were very painful for the time.

#### MAY IMPEACH PENROSE.

Pennsylvania Senator Is Not Disturbed Over the Possibility.

Washington, Aug. 20.—Senator Boies Penrose of Pennsylvania, is apparently not affected today by the talk of his impeachment on a charge that he accepted, in 1904, a check for \$25,000 from John D. Archbold, general manager of the Standard Oil company.

Penrose said he intended to discuss the matter in the senate. When the senate convened today Penrose gave notice that he would speak tomorrow on the question of privilege and would then discuss the correspondence between himself and Archbold.

## AUGUST Enameled Ware SALE

We bought from an Eastern factory 500 pieces of blue and white enameled ware at rock bottom prices. We are going to give you the benefit of this great purchase. The lot contains 10 quart water pails, large coffee pots, dish pans, preserving kettles, etc., values up to \$1.00.
