Citizens and Taxpayers. I announce myself a candidate for councilman in the Second ward and ask your assistance in the coming election.

I believe in applying the same economic business principle in administering city affairs that I would successfully use in a large private business.

I believe in conserving the interest of the taxpayers, requiring efficiency in all city departments, absolute fulfillment of agreements from all contractors; and do object to the suppression of competitive bidding where contracts are to be let.

THE BARREL.

Strong From Without and Sometimes Doubly Strong From Within.

Nobody knows who invented the barrel. It has been used since time immemorial.

Barrels are used for all manner of articles, solid and liquid. There are barrels for holding sugar, salt, apples, potatoes, and so on; for all sorts of oils, from the heaviest lubricants to the most volatile products of petroleum; for beers, wines and all sorts of beverages. It is contended that the barrel is the strongest structure of its size that can be made from an equal amount of wood. Its contents are frequently the strongest that can be made from liquids.

The barrel has tremendous power of resistance to pressure from within and from without. A barrel set on end will, it is claimed, support half the weight of a railway car while the truck is taken from beneath for repairs. Yet the primitive barrel is put together without nails, screws, bolts or pins. It is entirely self fastened.

The barrel is smaller at its ends than it is in its middle, so that the wooden hoops, self locking, may be driven on, tightening the staves and pressing the heads into the chimes. Although not caked, barrels are water tight. A small barrel is a keg, a big barrel is a cask, and a still bigger barrel is a hoghead.—Harper's Weekly.

Hotel Tips in Advance.

The Japanese custom of administering the hotel tips immediately upon arriving is clearly explained by Stafford Ransome. In former days the Japanese innkeeper made a small charge for the food he supplied, cost price or thereabout, and the guest, upon arriving, made a present of money to the house and another to the servants, indicating thereby both his own social rank and the class of accommodation he expected. However munificent these presents, it was polite for him to write "common stuff" or "rubbish" on the paper in which he wrapped them up. Fearful confusion resulted when Europeans with our ideas of tipping first came. Presented with a bill for the ridiculously small sum of 2 shillings, they thought a shilling tip handsome, when as much as 6 shillings was probably anticipated.—London Chronicle.

Bread Upon the Waters.

When Victor Hugo was in exile in Brussels he asked Rochefort to stand godfather to his son Charles. Rochefort accepted and in looking for a suitable present saw in a curiosity shop window a silver table ornament which attracted him and which he bought, though the price was 85,000 francs. When after 1870 Rochefort was sent to New Caledonia and his property confiscated Victor Hugo sold the ornament for the benefit of Rochefort's family. It turned out that it was the work of Benvenuto Cellini, and it brought in 200,000 francs.

RAINIER NOT SMOKING.

Alarm Spread by Apparent Smoke Is Cooled by Weather Prophet.

Tacoma, Nov. 27.—Mount Rainier is not smoking, as reported, according to Weather Forecaster Coover. Hundreds declared they saw smoke, believing it was from the peak, and feared an eruption. A cloud of vapor is the cause, declares Coover.

"The phenomena is caused by cold southwest winds striking against the sides of the mountain, forcing up a smoke-like vapor," explained Coover.
