FALSE COLORS.

Iridescence of the Opal is Merely a Matter of Formation.

The opal has no color in the sense of pigmentation. To break open an opal in order to observe its hues would be the equivalent to killing the goose that laid the golden eggs. Neither golden eggs nor rainbow hues would be found. Opal consists of hydrated silica. It is not uniform in texture. If the word surface may be used for interior conditions it might be said that the opaline silica is in the form of surfaces and layers that lie compactly against one another. These layers refract the light at various angles, giving forth the colored flashes in the same way that a pure crystal prism refracts the colors of the spectrum. Technically speaking, these layers of silica are said to possess a different index of refraction from that of the matrix. As the opal is moved the various layers break the light into colors, which change, of course, according to the position of the stone.

The iridescence of nacre, or mother-of-pearl, is also a matter of form and not actual color. In fact, all "changeable" colors are more or less the result of form even where there is pigmentation beneath, such as in certain ribbed silks. When sunlight bears directly upon finely ribbed metal, as a file, there is the same play of colors. In the case of mother-of-pearl an interesting experiment has been made. An impression of the pearl was taken upon pure white wax. It was then found that the apparently smooth surface of the pearl had still sufficient irregularities to impress upon the wax a surface that resulted in similar color manifestations.—Harper's Weekly.

Barbers Ages Ago.

The first barbers of whom there is any record plied their trade in Greece in the fifth century B. C. In Rome the first barbers operated in the third century B. C. In olden times in England the barber and the physician were identical. Thus a king's barber was also his chief medical adviser. In the time of Henry VIII. of England laws were made concerning barbers, of which the following is an extract: "No person occupying a shaving or barbery in London shall use any surgery, letting of blood or other matter, except the drawing of teeth."

The Real Simon Pure.

"The real Simon pure" is one of those phrases which every one understands and not one in a hundred could account for. Simon Pure was a Pennsylvania Quaker in Mrs. Centlivre's "A Bold Stroke For a Wife," produced at Drury Lane theater, London, in February, 1718. One Colonel Feignwell passes himself off as Simon and wins the heart of a Bristol heiress, Miss Lovely, after which the real Simon Pure turns up.
