### New Probationary Baseball Contract Will Not Last.

### MAY CAUSE LOTS OF TROUBLE

Rule Was Passed For Protection of Minor Leagues, but Was Unnecessary—Evers Talks of Modern Baseball—Hoodoo May Follow Merkle.

By TOMMY CLARK.

This new probationary contract which the major baseball leagues are forced to submit to the players purchased and drafted is going to be short lived. The new order of things is going to make trouble sooner or later, and its fallacy will then be realized. This contract gives the player only 25 per cent increase in salary over what he received in the minors, and the contract is but of forty-five days' duration. This means that in the event of a player making good during that period the club for which he is playing must enter into a new contract with him, and the argument of salary, which is usually always straightened out before the season opens, may come at a time when harmony is most desired and bring about a condition which is detrimental to the team.

Incidentally, the young player who is drafted or purchased and has been playing in a small league at a low salary will not feel much encouraged when he receives his first major league contract and finds that he is raised but a few dollars.

This rule was passed for the protection of the minor leagues, who claim to have trouble satisfying the players who go up to the majors at an increased salary and are returned because they fail to make good. But no rule or change of system was necessary to combat this annoyance, for it stands to reason that if a player expects an increase when he comes to the majors he should expect a cut when by reason of his incompetency he is returned to the minors.

If baseball history repeats itself, Fred Merkle, the Giants' first baseman, will be out of major league company shortly, while Jake Stahl, the Boston Red Sox manager, will be found doing bench duty next season.

It is strange, but true, that world's series first sackers seldom last long. In fact, there seems to be some sort of a hoodoo which follows the men who play the initial sack on the teams which win pennants.

Go back a few years and this will be proved. There never was a more sensational player in a world's series than Jiggs Donohue in the series in 1906 between the Sox and Cubs, and yet Jiggs could not find a big league job two years later. Big Dan McGann of the Giants did not last long after the 1905 series with Philadelphia.

The surprise of the 1907 series be-

tween the Tigers and Cubs was undoubtedly Claude Rossman, and yet the following year Jennings got rid of him and he drifted into the minors. In 1909 Bill Austern looked to be a most valuable man in the position until after the world's series, and then Pittsburgh let him out and he drifted into St. Louis, but failed to make good, and he has had a hard time ever since holding his own in the minors.

Just two years ago saw Harry Davis and Frank Chance battling at first base in the world's series. Now both are virtually out of baseball as far as the playing end is concerned. The former is not connected with any club, while the latter will manage the New York Americans next year.

The question of whether baseball has improved in recent years is one which is often disputed by some of the veteran ball players.

Johnny Evers, manager of the Chicago Cubs, related an incident the

other day in answer to the question whether or not the game had made any forward strides, which is well worth telling.

"I don't know of any better illustration of whether or not the game has advanced than the case of John M. Ward, who was one of the greatest players of the old days and who was president of the Boston Nationals for a few months in 1912. If the game hadn't advanced Mr. Ward should have known as much as any one," says Evers.

"One day, when 'Hub' Purdue was pitching for Boston against the Cubs, 'Hub' had two strikes and no balls on Sheckard. 'Hub' put the next one over the plate, and Sheckard landed on it for a hit and drove in the runs which won the game. After the game Mr. Ward went to the dressing room and gave Purdue a tearing out. He then notified the Boston pitchers that the next time a pitcher had two strikes and no balls on the batsman and then put the ball over the plate, the twirler would be fined \$25.

"The players told us about the new rule. We had three more games in that series with the Boston team. Every time one of us got two strikes and no balls we knew that the pitcher didn't dare get the next ball near the plate. So we let that one go past and took a lusty swing at the pitched ball that followed. Say, we had a regular picnic. I guess that's a little of what might be called 'inside' baseball."

### Foreign Affairs.

As a change of climate is almost always beneficial, it may be that moving to Asia Minor would improve the health of the "sick man of Europe."—Rochester Post-Express.

It is explained that the kaiser's order forbidding German diplomats to marry wives of other nationalities is intended to prevent a leakage of diplomatic secrets. Have the conditions so changed in Germany since De Blowitz said: "In Paris the fish talk. In Berlin the parrots are dumb?"—New York World.

### BITS FROM HEINE.

If freedom should at some future day vanish from the earth a dreamer would again discover it in one of his dreams.

Literary history is the great morgue where all seek the dead ones whom they love or to whom they are related.

Psychical pain is more easily borne than physical, and if I had my choice between a bad conscience and a bad tooth I should choose the former.

God has given us speech in order that we may say pleasant things to our friends and tell bitter truths to our enemies.

## Quality---Cheapness

When a customer has once been educated to quality, he will seldom seek a store that appeals merely to the desire to save pennies.

There are communities where quality arguments would have no weight, but many more could be educated toward quality if the right arguments were used.

Quality arguments are sometimes slow trade builders, but they build exceedingly strong—bargain goods are only a bargain to those who cannot afford the best, but there is generally a hole in the bargain.

If you simply want bargain coffee pay the cheap price and get it. If you want absolute purity and perfect flavor, the kind that brings you back for more, pay more and get more.

Quality has been behind every business that has built up a solid reputation.

### Your Child's Health • Your First Thought

If you have children, naturally your first thoughts are for their health. You certainly want them to develop strong, healthy constitutions. The most careful attention must be given when children show the first symptoms of the many common ailments. Perhaps they are weakly and thin, or grow too fast, thus sacrificing strength. These and other apparently minor ailments may be the forerunner to a weak constitution for life.

Such children need Jayne's Tonic Vermifuge which is essentially a child's tonic. First of all, it will properly care for the child's stomach. It will also improve the appetite, and will add strength to the organs of the body. In cases of thin or impure blood, it increases the number of red corpuscles, enabling the enriched blood to keep the body healthy and strong.

Among the most common ailments the children develop is that of a disordered stomach, leading to an impaired digestion. In many cases this trouble is due to parasites in the intestinal tract. To correct such trouble, Jayne's Tonic Vermifuge is unsurpassed.

For more than eighty years millions of children have been restored to health through the use of this tonic. Insist upon Jayne's; accept no other. Sold by druggists everywhere. Dr. D. Jayne & Son, Philadelphia, Pa.

### \$100 Reward, \$100

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that fails to cure. Send for list of testimonials.
