During the past week the management of the O-W. has made some improvements in the station at this point. Heretofore persons having baggage to check had to leave the waiting room and enter the baggage room from the outside. The new arrangement enables the passenger to enter the checking room through a door that leads from the ladies' waiting room. The baggage room has been moved to one side and the interior has been treated to a coat of fresh paint. The ticket office has been refloored and other minor repairs about the building have been made which will add to the attractiveness of the place and convenience of the force and the traveling public.
