THE Gossard CORSETS

They lace in Front

Front lacing is not the only
requirement of a perfect cor-
set.

The popularity of the Gos-
sard Front Lacing corsets has
been followed by a number of
imitations. Other than lacing in
front all these imitations are
totally lacking in the essentials
which make Gossard corsets so
extremely desirable.

Every woman who investi-
gates buys a Gossard corset.

A complete line of all mod-
els and sizes always on hand.

IMBLER MEETING PLANNED

Mass Meeting to Discuss Incorpora-
tion Question Called.

Imbler, Ore., Feb. 11.—(Special)—
A meeting will be held at the L. D.
S. church on Wednesday evening,
February 12, 1913, at 7:30, for the
purpose of discussing the bounder-
ies of the proposed incorporation.

It seems to be the general opinion
that the town of Imbler should be
incorporated, but a great difference
of opinion as to where the lines of
such incorporation should run.

Every person interested is urged

to attend this meeting and express
their wishes in the matter.

L. A. Stringham, one of Union coun-
ty's most noted Shire horsemen was
in town today transacting business.
Mr. Stringham has one of the best
coming three year old Shire stallions
in the state and also his extra fancy
fillies which he is going to raise
choice stock from for the market. He
thinks as most all draft horsemen
that the Shire is going to be the
coming horse of the United States.

A Projectile's Gain of Speed.

Experiments with improved instru-
ments for measuring the velocity of
projectiles have shown that the speed
goes on increasing after the missile has
left the mouth of the cannon. Leaving
the muzzle with a velocity of 1,474 feet
a second, a projectile has been observ-
ed to increase its speed to 1,689 feet a
second within the first six feet. It is
only after having traveled twenty-five
yards that the projectile's velocity be-
comes reduced to the speed it had on
leaving the muzzle. This is ascribed to
the impulse of the expanding gas be-
ing felt for some distance beyond the
cannon's mouth.—New York Tribune.

Moisten the Buttonhole.

Every man knows the difficulty and
agony of a refractory collar stud. With
a breakfast to eat, a train to catch and
an appointment to keep, few things are
more maddening than the collar which
simply will not ally itself to the stud.
But few things are so easy to remedy.
All that is necessary is to dip the
thumb and forefinger in water and
slightly moisten the obstinate button-
hole. Then the stud slips in without a
murmur.
