We Sell Edison Mazda globes

and we recommend their use

The manufacturers claim that the Mazda gives three times as much light for the same money as the old style globes. We have tested them out and found them far superior to the old kind.

If you haven't tried the new Mazda globes, by all means do so. If you are not an electric light user, we urge you to investigate the merits of the new globes. We believe the result will substantiate our claim that electric light is not only the best but the most economical for you.
