

Pimples Should Be Watched

May be Means of Absorbing Disease Germs in Most Unexpected Manner.

Make Your Blood Pure and Immune With S. S. S.

The world renowned laboratory of the Swift Specific Company has collected a vast amount of information regarding the spread of blood diseases. In thousands of instances the most virulent types have been the result of coming in contact with disease germs in public places, and the apparently insignificant pimple has been the cause. It spreads with astonishing rapidity, often infecting the entire system in a few days.

It is fortunate, however, that there is a remedy to cope quickly and thoroughly with such a condition, and thanks to the energy of its producers the famous S. S. S. may now be had at almost any drug store in the civilized world.

This preparation stands alone as a blood purifier. It is somewhat revolutionary in its composition, since it accomplishes all that was ever claimed for mercury, iodides, arsenic, and other destructive mineral drugs, and yet it is absolutely a purely vegetable product. It contains one ingredient which serves the active purpose of stimulating each tiny cellular part of the tissues to the healthy and judicious selection of its own essential nutriment. There are more cases of articular rheumatism, locomotor ataxia, paresis, neuritis, and similar diseases resultant from the use of minerals than most people are aware of. These facts are brought out in a highly interesting book compiled by the medical department of The Swift Specific Co., 137 Swift Bldg., Atlanta, Ga. It is mailed free, together with a special letter of advice, to all who are struggling with a blood disease.

Get a bottle of S. S. S. to-day of your druggist. It will surprise you with its wonderful action in the blood.

INCOME TAX.

expense of maintaining the government."

As to the second contested feature of the new law, which relates to taxing "dividends" of insurance companies in the east and also reams of protests from the big insurance companies of the east and also reams of newspaper vitrol, Hull said:

"In drawing that part of the bill we used exactly the words prescribed in federal court decisions, to prevent any test of the law in the courts. If you will examine the bill carefully you will note that we declare that 'dividends' of the insurance companies are taxable. We did not use the word, revenue, or income, or proceeds—but the word 'dividends.' This has been construed by the federal judiciary in the case of Knowlton versus Moore, to mean the actual profits of the companies, derived not from overcharges to policyholders upon their premiums, but on their actual proceeds from investments, loans, real estate rentals etc. The courts decided that the questions of dividends is a question of fact and not of law. They declare that the facts must necessarily be ascertained in each particular case."

When asked how the actual operation of the insurance clause would occur, Hull said:

"The insurance companies in making their income tax returns to the federal authorities will deduct from their taxable income all excess money construed as overcharges in premiums upon policies. If the federal authorities deem that the incomes of the companies should include certain payments to policy

holders, construing each individual case upon its merits, and contending that such payments are not in fact premium overcharges but revenue from invested capital—i. e. dividends—the collector can bring suit and cause actual ascertainment of the facts in the case by the federal courts."

Hull and the Democratic leaders take the position that the wealthy insurance companies should pay taxes upon their incomes derived from quick and big profits upon "call money" loaned in the New York stock exchange and other Wall Street sources. They save gigantic "reserves" built up by the companies, and withheld from policy holders, while fat salaries are paid the officials.

"Much of the broadsides of criticism of the new tax have come from sources which declare that they favor the bill," said Hull. "That is the worst kind of criticism—from pretended friends."
