

Better Marketing.
Washington, June 2.—A new branch of agricultural education was formally launched at the department of agriculture today. It was the "rural

organization service," designed to aid farmers along economic buying and selling lines. It is particularly designed to educate the farmer in the better marketing of his products. Heretofore the department has devoted its energies toward educating the farmer in production of better crops. Dr. Thomas N. Carver, formerly of Harvard university, will be in charge of the new bureau, which is expected to save thousands for the farmers of the United States.
