The specialist makes his findings in each separate case and forwards them to the head offices where final disposition is made of them. The several thousand employees here have been taking the examinations yesterday and today as they come in from their runs.

ROCKEFELLER IS 74 TODAY

Cleveland, O., July 8.—Seventy-four years old and the "richest man in the world"—worth upwards of half a billion dollars according to his business associates—John D. Rockefeller celebrated his birthday today. There was no elaborate program planned for the anniversary. The Oil King spent the morning at Forest Hill. He received hundreds of messages of congratulations from business and personal acquaintances. Rockefeller's health is better today than it has been in years and Dr. H. F. Bigger, his physician for many years, has assured him that he may count on many more birthdays. A game of golf, an automobile ride in the country and calls from relatives and friends made up the birthday program.

Dr. Bigger attributes the health of both his wealthy patient and himself to his always followed "system of living." This system he describes in a recently issued pamphlet which he has distributed among some of his friends. Its keynote is simplicity. Strict study of personal needs and constant watchfulness, also are among the essentials of longevity, according to the pamphlet. Two meals a day, one entirely of uncooked fruit; an occasional day of fasting from all foods but fruit; epsom salt baths frequently and a few Turk-

ished by the moderate use of tea or coffee; both should be drunk without cream or sugar. The penalties for their excessive use are dyspepsia, nervousness, constipation, insomnia, irritability, irregular and intermittent pulse, hardening of the arteries, neurasthenia and bad heart."
