ELBERTAS ON SELLING SHELF

BEST LOT OF PEACHES TO DATE RECEIVED.

Various Kinds of Early Apples, Home Grown, Sold Now.

Elberta peaches, a freestone variety that is proving of higher grade than any of the offerings to date, are presented for the fastidious shopper locally today. With the Elbertas, which rank along with Crawfords, are various grades of home grown apples to pick from.

Astrekan apples, Red Junes and other early varieties are now of a good quality and plentiful, and the Saturday morning offerings this week will be wider in range by a considerable degree than last Saturday and probably at no time of the summer will grocers handle a better and greater variety of fruits and vegetables than right now.

There are no material shiftings in prices on any commodity today.

Local market quotations today are:

GOVERNMENT STUDIES FRUIT

GOVERNMENT EXPERT VISITING OREGON THIS WEEK.

Best Time to Pick Fruit and Best Pack Objective Lesson.

Portland, Ore., Aug. 15.—What is the best way to pick, gather and pack fruit, and what degree of ripeness is best at which to start harvesting operations?

The question is a serious one and its solution really means the success or failure of the fruit industry. The United States government is now trying to solve the problem. H. J. Ramsey, pomologist of the government is making a tour of leading fruit-producing sections of the Pacific coast and is gathering his data at close range. Today he was conferring with officials of the Northwestern Fruit exchange of this city, regarding various matters in connection with his work.

"There is a certain degree of ripeness at which fruit is best to send to market," says Mr. Ramsey, "and we are trying to find this degree. We want to find it for two reasons—it will give the producer a chance to get the bulk of his crop to market in the best marketable condition and it will enable consumers to secure a better quality product than they have been accustomed to."

"We will continue our investigation in Oregon this season as to the best methods and varieties of apples for storage purposes. Our work heretofore has been most successful and when we arrive at a definite result, we will give the report to the public. Investigations regarding apples

Look Out For Poison Ivy
Keep Your Blood Pure and Danger will be Avoided.

All Blood Disorders are Knocked Out by S. S. S.

Struggling through the woods or clearing brush, picnickers, hunters, fishermen—look out for poison ivy. And in the meantime keep your blood pure by using S. S. S. If your skin is rough with eczema, pimples or any other eruption, S. S. S. stimulates the fine network of blood vessels in the skin to dry up and heal all sore spots. S. S. S. will do this positively. It dominates the principle of osmosis, stimulates the cells of the skin to select their own nutriment from the blood, made pure and healing by the wonderful medicinal ingredients of this famous blood purifier. It is a safe remedy, as it contains no minerals, and yet its action is a marvel. You can get S. S. S. in any drug store, but insist upon having it. The Swift Laboratory in Atlanta, Ga., prepares this famous blood purifier, and you should take no chance by permitting anyone to recommend a substitute. And if your blood condition is such that you would like to consult a specialist freely, address the Medical Dept., The Swift Specific Company, 139 Swift Bldg., Atlanta, Ga.

will be made in both the Rogue River and Hobd River valleys this season. Rogue River valley, where he will investigate the precooling and shipping of the pear crop. The work in Oregon this season will be under the direction of A. W. McKay, who recently came here from Washington, especially for this task. He succeeds B. B. Pitt, the expert, who leaves the employ of the government to go to the University of California at Berkeley.
