This is to certify that I have been a great sufferer from Rheumatism since 1894. Contracted the disease while working with a snow plow on

the railroad. For several years I have been obliged to use crutches a great part of the time. Having used three boxes of the Meritol Rheumatism Powders, I have thrown away the crutches and am now almost fully recovered. It certainly has done wonders for me and I heartily recommend it.

RESTING A RAZOR.

Why Letting It Lie Idle For A While Improves the Blade.

It is well known that our metals are conductors of electricity. Steel is an excellent conductor, and when this metal is fashioned into tools with sharp edges the electric current that is continually passing through the metal will leave the body at the sharp point or edge.

Barbers tell us the razor gets tired and is improved after a rest. This is true in a scientific sense. It is not exactly a rest that the razor needs, although the term will express it pretty well.

It seems that any razor, after constant use on the human face, will become not exactly dull, for the barber can sharpen it, but rather sluggish and refuse to work as smoothly as when it has lain for a few weeks without work.

Constant use and continued sharpening put the molecules into a sluggish condition, and it is impossible to get the same edge as when the steel has not been used for some time.

When the razor lies idle and the electric current is passing off at the edge the particles are being toned and tempered, and the edge actually becomes more smooth and really sharper and more fit to remove the beard.

It is claimed that a razor wrapped in rubber cloth and placed in a drawer away from any lamp will not be benefited by the rest as will a razor that is simply laid away rather carelessly without any insulation. It is the same if the razor is inclosed in a glass case, for the insulation prevents the electric current from passing through the metal.—Harper's Weekly.

A Forgetment.
Citizen—You ought to know something about him and that sort of thing. Tell me, what is a "forgetment"?
Sighs—Why, it's a piece of string that your wife ties around your finger when you go in town on an errand.—Philadelphia Press.

Not Nervous.
Hubbard—Simpkins has got over his nervous prostration. Pease—How can you tell? Hubbard—Why, I met him last night and he wanted to borrow \$20.—London Telegraph.

A Question.
Tommy—Father, isn't the world older than it used to be? Father—Certainly it is, my son! Tommy—Then what do people mean by talking about "old times"?
Worry is friction, inactivity rust. Both destroy the human machine.

THE Gossard CORSETS

They face in front—as a result the abdomen is relieved of all pressure. Support is given to the organs and deep breathing is encouraged. They emphasize the long graceful line of the back, which artists agree is the most beautiful line in art. They gently but surely compel a correct standing position and a graceful carriage. I invite you to investigate these wonderful corsets.

A trial fitting will please you. Prices \$3.50 to \$8.50.

A complete line always on hand of the different models and styles.
