WALLOWA HAS CLOSED DATE

WILL DECIDE CHAMPIONSHIP WITH PENDLETON

Gateway City to Play at Pendleton Next Thursday Afternoon

Pendleton, Nov. 21.—(Special)—Regardless of the outcome of the football game between Pendleton and Walla Walla this afternoon, the local high school team will appear again in a Thanksgiving day battle with the Walla Walla high school team. Negotiations for the game were concluded last night when a message was received from Wallowa accepting the terms offered.

This game will be for the championship of eastern Oregon. The Pendleton boys thought that the victory over Baker gave them an undisputed claim to this title but since Wallowa boys have beaten both La Grande and Union high schools by one-sided scores, they have been forced to recognize the justice of the demand for a game to settle the championship without question.

The game with Walla Walla today will commence promptly at 3 o'clock. The Garden City boys came over with the expectation of winning by a fair-sized margin, but the locals figure they destined to add another scalp to their belt.

DON'T DOPE A PUNY CHILD

Parents—don't give that puny, ailing, underweight child any of those so-called "tonics" containing alcohol or dangerous drugs; such stuff won't give relief and health to grown people, let alone children. Its purpose is to stimulate for a short time after each dose, just as whiskey or morphine does, thus making you believe it is doing real good.

Give that child something that will really build it up—replenish the wasted tissues—feed the stunted, dwarfed, puny muscles—make it lively, strong, well—full of the animal spirits children are meant by nature to have. Give it **REXALL OLIVE OIL EMULSION**.

Rexall Olive Oil Emulsion is wholesome, nourishing, free from alcohol and dangerous drugs. It's the ideal nerve, blood and body builder. It does the work it is planned to do better than any other medicine we know of, and our faith in it is so great that we not only urge you to use it and give it to your children—but we guarantee that it will do all we say it will, or give you nothing.

Rexall Olive Oil Emulsion should be given to children who catch cold easily. Begin right now, and use it to build up the child's system to such strong health that it can resist colds, croup, grippe, bronchitis, catarrh, pneumonia, and other cold weather diseases. You who are weak and run-down, and you who are well now, but are liable to suffer from various cold weather ailments, use Rexall Olive Oil Emulsion to get and keep well and strong. For the tired-out, run-down, nervous, emaciated or debilitated—the convalescing—growing children—aged people—it is a sensible aid to renewed strength, better spirits, glowing health.

Rexall Olive Oil Emulsion—king of the celebrated Rexall Remedies—is for freedom from sickness of you and your family. You'll be as enthusiastic about it as we are when you have noted its pleasant taste, its strengthening, invigorating, building-up, disease-preventing effects. If it does not help you, your money will be given back to you without argument. Sold in this community only at our store—The Rexall Store—one of the more than 7,000 leading drug stores in the United States, Canada and Great Britain.—Hill Drug Store.

Notice to Contractors

Bids will be received for the excavation of the basement for the Y. M. C. A. building, the rough work to be done this fall and winter at the pleasure of the contractor and the finishing work to be done during the month of April, 1914. Bids should be at certain price per cubic yard and the yardage to be determined by survey. Details can be obtained from the architect, Milton S. Block. Bids to be handed to W. H. Bohnenkamp on or before November 24, 1913.

At same time bids will also be received for the delivery of the sand and gravel for the construction of the building.

W. H. BOHNENKAMP,
Chairman of Building Committee.

ANIMALS IN OPERA.

Some of Them Raised Up Their Voices With Weird Effect. Few persons realize how many animals appear in opera. By this I do not mean such animals as the tenor who played the part of Lohengrin and was told by Von Bulow that he was the "right of the swine rather than of the man, but real bona fide animals. They extend all the way from Montecarlo to Wagner.

About A. D. 1000 it was not unusual to have lions or elephants upon the operatic stage. One can never tell what these animals may improvise in their parts. I know of a case where an elephant caused a most hasty exit of the orchestra in London long ago, when the father of R. E. Woolf, the Boston critic, was conducting.

The donkey in Leoncavallo's "Pagliacci" has not a speaking part, yet once that I know of he lifted up his voice and made Canio's great solo an unexpected duet. Balaam himself was not more astonished than was the tenor on that occasion.

In spite of the saying, "Thou shalt not yoke the ox and the ass together," Pierne caused these two to sing a duet in "The Children of Bethlehem." On this occasion the ass was a tenor, but I do not believe that Pierne meant any reflection upon the high voiced fraternity.—Louis C. Elson in Musical Observer.

BURNING IRON CHIPS.

Combustion Proceeded Exactly as in a Pile of Coal.

To the average man it is inconceivable for iron or steel chips to actually burn as so much inflammable material, but nevertheless such is possible, and such incidents are the part of positive record. This phenomenon is explained by the fact that finely divided iron or steel may sometimes oxidize faster than it can get rid of its heat and consequently gives signs of complete combustion.

A large pile of chips took fire in the yard of a machine shop not long ago, and the fire was described by a witness as follows: The chips were put through a centrifugal separator, and the small amount of oil remaining had nothing to do with the fire. It was a plain case of burning iron. The metal was so finely divided and presented so much surface to the oxygen in proportion to the radiating surface of the pile that, once started by the heat from a nearby rubbish pile, the combustion proceeded exactly as in a pile of coal, only apparently at a more rapid rate.

The metal had not melted. Where the fire had been hottest the chips were a dark blue. The pile sank about a third in height, and a lot of metal must have been oxidized to create so much heat.—American Machinist.

Women of Influence.

We are, all of us, whether young or old, famous or obscure, women of influence. We cannot live a day without affecting the world somewhat for good or ill, whether we will or no. We are all a part of life's forces, whether we know it or not. Be as humble as you like, you are still a person of influence. If not by your own choosing, then often by God's decree. It may be only a smile or a simple kindness that you have given to a little child, but it starts agencies you little dream of; or it may be some selfishness and lack of honor, some weakness in you that sets in motion a long train of hurtful and sad influences or circumstances. For all life is connected, and whether you wish it or not your life affects other lives.—Woman's Home Companion.

Testing His Love.

"Pshaw," said the pretty brunette. "It's the easiest thing in the world to find out whether a man loves you!" "What is your method?" asked the stately blond. "Make him spend his last dollar on you, and if he seems to enjoy it you may be sure that he really cares for you."—Chicago Record-Herald.
