Hot dry air at 72 degrees in a room will cause to the occupant a chilly, uncomfortable feeling, while the same room at a temperature of 62 degrees with proper humidity and plenty of fresh air will be pleasanter and more healthful, besides there is economy in the fuel, consumed. People shut up in steam heated rooms soon become nervous and irritable. One of the most common results from a steam heated apartment is nasal catarrh. The air must be distributed about the room so persons in every part of the house may receive good air.

The warm air furnace system properly installed, is at present the only available system for the proper heating and ventilating of a home. A Torrid Zone Warm Air Furnace will fill all requirements.
