Hot dry air at 72 degrees in a room will cause to the occupant a chilly, uncomfortable feeling, while the same room at a temperature of 62 degrees with proper humidity and plenty of fresh air will be pleasanter and more healthful, besides there is economy in the fuel, consumed. People shut up in steam heated rooms soon become nervous and irritable. One of the most common results from a steam heated apartment is nasal catarrh. The air must be distributed about the room so persons in every part of the house may receive good air.

The warm air furnace system properly installed, is at present the only available system for the proper heating and ventilating of a home. A Torrid Zone Warm Air Furnace will fill all requirements.

Dr. W. C. Waffle who has been engaged in the practice of chiropractic for almost a year in this city, leaves tonight for San Antonio where he will take over the management of a large sanitarium. He has been unusually successful in this city and is of the opinion that the lone star state will be even better. He has sold his practice to Dr. R. C. Allen and A. P. Ingram. Dr. Allen has been here for some time and was associated with Dr. Waffle, making Elgin daily. He will now confine his work to La Grande solely. Dr. Ingram is a recent arrival to the city and comes here from Coquille, Oregon. He is a graduate of the Palmer-Gregory School of Oklahoma City, and has taken courses in various methods of drugless healing.

Harps of Old Still Sound.

Surely a poet should be found somewhere, to sing with fitting sentiment the story of how archaeologists in Egypt lately have come upon ancient harps, three thousand years old, the strings of which are still intact and give forth musical sounds after thirty centuries of silence.

The poet above-mentioned should devote several lines to saying, poetically, that though we of today have seen sights the ancient peoples saw, though we have read their books, viewed their embalmed remains, thought their thoughts and retrud their pathways, never before have our modern ears listened to their musical sounds. Ancient music is almost a sealed mystery to us, even though a few written phrases have remained to be imitated on our instruments. But would it not give us a strange sense of nearness to them, of oneness with them, to hear with our ears the same note that once calmed the rage of a Rameses!

Boom!

"That new maid at Mrs. Van Winkle's threw some gunpowder in the stove by mistake and was blown through the roof. Poor girl!" "No, poor Mrs. Van Winkle. That's the fifth maid this year who has left her without giving notice."

To Drive Out Midwifery.

Philadelphia, Jan. 22.—Alarmed at the reports of investigations, the Bureau of Medical Inspection and Licensure, today is planning a vigorous warfare to be waged on the 800 or more illegal midwives who

are practicing in Philadelphia. The majority of these women, according to officials, have never taken any course that "would fit them for the medical profession or even to act as nurses in obstetrical cases." In the coal regions, investigators learned, there are hundreds of these "midwives" who advertise in the various languages "and ply their trade with no knowledge of the most important and physical and medicinal laws they should understand. According to the investigators, Pittsburgh is the center, even more than Philadelphia, of illegal midwifery.
