## FOR A FEW DAYS ONLY A Handsome Plated WATCH CHAIN

To Each Purchaser of a 5-cent Sack of "BULL" DURHAM Tobacco

This watch chain is just the kind *any* man will be glad to own and use—because it is the very latest thing, thoroughly good form, and *finely-made*. If you are already provided with a watch chain, take one of these free chains home to "the boy." He will be delighted. (Only one chain to a customer.)

### GENUINE "BULL"

## DURHAM SMOKING TOBACCO

(Enough for forty hand-made cigarettes in each 5c sack)

"BULL" DURHAM is smoked by *more millions* of men than *all* other high-grade tobaccos *put together*—because for 53 years it has appealed *most strongly* to discriminating smokers who want just *pure, good tobacco* of natural flavor.

Cigarettes *hand-made* from "BULL" DURHAM Tobacco afford a *lasting enjoyment and satisfaction*—and possess a delightful aroma—*not possible in ready-made cigarettes*.

Enough "BULL" DURHAM Tobacco is sold in a year to make approximately *12 billion* cigarettes—about as many as all brands of ready-made cigarettes in this country *combined*—and the sales are *still growing*.

This offer of *free* watch chains is made solely to induce more men to "get their own" and learn how much more *fraternal and satisfying* a "BULL" DURHAM cigarette is than any ready-made cigarette.

#### The Right Way to Roll a Cigarette

I. In fingers of left hand, hold cigarette paper curved, so as to receive the tobacco. Four right quantity of "Bull" Durham out of muslin sack with right hand, strewing tobacco evenly in paper.

II. Then place your two thumbs next to each other in the middle of the paper in this position.

III. And roll the cigarette on the lower fingers, so that the index fingers move up and the thumbs move down. With the thumbs, gently but firmly force the edge of the paper over the tobacco, and

IV. Shape the cigarette by rolling it with the thumbs, as you draw them apart.

V. Hold the cigarette in your right hand, and

VI. Moisten the projecting edge of the paper.

VII. With fingers close ends of cigarette by twisting the paper, and you have a cigarette properly made, properly shaped and ready to smoke.

VIII. This is NOT the way to make a cigarette. The thumbs—not the index fingers should be used.

## NEW INVENTION GATHERS GOLD

MACHINE GATHERS SMALL PARTICLES OF DUST.

Invention Has Been Patented and It Works Successfully.

What may be characterized as one of the most remarkable inventions recently patented, is a so-called Victor Centrifugal Microscopic Gold Separator. The inventor is Martin Johnson of North La Grande, who has just received a patent from the U. S. patent office at Washington, D. C. The name almost describes the instrument, or rather machine. It is intended to gather those minute particles of invisible gold from the water of most streams and hold them by means of a contrivance rigged up in the fashion of a cream separator. As a matter of fact it is built on the idea of the cream separator, with this main difference that instead of feeding from the top it feeds from the bottom. The machine is set in the water and causes the gold bearing fluid to be forced up and into a chamber equipped with mercury compartments. One could get a better idea of it by comparing it with a muffler on an automobile, or the silencer on a gun. The water passes freely through this compartment and the small particles of gold adhere to the quicksilver and are held until taken out. The rotary shaft which runs through the center of it causes a rudder like contrivance, placed horizontally at the bottom to force the water upward. This will be run by a one-horse power dynamo.

The machine can be placed in any kind of stream and will handle a ton of water per minute. In this manner water that is not heavily charged with the yellow substance can be made to pay, inasmuch as water power may be had along most of the streams to create the power.

The inventor has never mined in his life, but has been a student of mechanics and physics. He has been a lumberman most of his life, has invented things for pastime, and believes that he has now invented a machine that will be the climax of his inventive career.

Mr. Johnson is a native of Norway and is about 50 years of age. He patented a pivotal window some years ago, which has been adopted by many constructors of large buildings, but, has, like many other humble inventors, made little out of it himself.

The new model has been tested out in the Marsh creek near Boise, and streams of California, and has proven successful. A Baker concern is making the first machine and this will be in operation along the Snake river as soon as completed. It is estimated that with water delivering 30 cents per ton of gold, the machine will be a paying investment.

It has always been known that water bears gold in varying quantities, but no one has ever invented a process by which the fine substance could be extracted from the water and make it pay. The public will watch this new invention with a great deal of interest.

#### Wonderful Cough Remedy.

Dr. King's New Discovery is known everywhere as the remedy which will surely stop a cough or cold. D. P. Lawson of Eidson, Tenn., writes: "Dr. King's New Discovery is the most wonderful cough, cold and throat and lung medicine I ever sold in my store. It can't be beat. It sells without any trouble at all. It needs no guarantee." This is true, because Dr. King's New Discovery will relieve the most obstinate of coughs and colds. Lung troubles quickly helped by its use. You should keep a bottle in the house at all times for all the members of the family. 50c and \$1.00. All druggists or by mail, H. E. Bucklin & Co., Philadelphia or St. Louis.

#### How to Prevent Bilious Attacks.

"Coming events cast their shadows before." This is especially true of bilious attacks. Your appetite will fail, you will feel dull and languid. If you are subject to bilious attacks take three of Chamberlain's Tablets as soon as the symptoms appear and the attack may be warded off. For sale by all dealers.
