Specify - Electric - Lights

-For Your New Home-

If you are building this year specify electric lights. It is safe to say that 90 per cent of the houses built in La Grande this year will install them. No home is modern without them. They are as important as sanitary plumbing.

Good lights are equally important, however, if you happen to live in a rented house. Your landlord owes it to you, and you owe it to yourself to have nothing but the best light. Electric lights are easily installed and will prove a source of lasting satisfaction to you. Call or phone Main 34.

LUCK IN PHOTOGRAPHY.

A Suggestion That Grated Upon the Camera Man's Nerves.

When the amateur photographer's friend asked him why he looked peeved the other was glad to explain.

"A friend of ours just asked me to come over and take a picture of her baby," he said. "She apologized for asking, which was unnecessary, because I was glad to do it, but she spoiled the beans by giving as her reason that I had such good luck taking pictures."

"Well, you do, don't you?" inquired the friend.

"There you go," the photographer exclaimed. "There is no such thing as luck in my photography. What vexes me is that every one seems to consider them inseparable."

"Photography is as exact a science as running a survey nowadays with those who know how to handle a camera. With the photometer and exposure tables, proper developer and a thermometer for determining its temperature, every last element of luck is removed from exposure and negative-making. The same is true of the printing processes. You know in advance how much light you have and how much you need. Factorial tables tell you how long to leave a plate in the developer. Every step is timed with a stop watch. And that's why it annoys me to have people say that my art is a luck proposition."

"Before I had taken as many pictures as stand to my record now there was sometimes luck, mostly bad. Although, as it appears to me at present, I got better results than I should have obtained. But if a man with a little experience and the proper outfit exercises as much intelligence as is necessary to boil eggs, photography is no longer a matter of luck, and I think nobody to call me lucky."—Philadelphia Ledger.

A Boston Cook.

"Cook," said the head of the Boston household, "I think you use too much salt."

"I assure you," was the polite rejoinder, "that I restrict its use to the absolute minimum compatible with culinary exigencies."—Seattle Post-Intelligencer.

Wrong Interpretation.

"I think the baby has your hair, ma'am," said the nurse girl, looking pleasantly at her mistress.

"Gracious!" exclaimed the lady, glancing up from her novel. "Run into the nursery and take it away from him! What will he do next?"—Stray Stories.

Discords.

"The very sound of some people's voices is exasperating."
"Quite true. Especially when they say 'move on' or 'hey up'."—Birmingham Age Herald.
