ITS PRODUCT TOO GOOD.

A Wonderful Oil Well That Was Found in the Balkans.

In Mr. Caton Woodville's "Random Recollections" is the story of a rich oil well that was discovered in the Balkans.

On one of his journeys he was shown a deep hole, sunk most probably by the ancient inhabitants of the country for mining purposes, but which he was assured was a petroleum well. Afterward Mr. Woodville heard the full story of this well.

A petroleum "find" was reported from the district, and an expert from Baku, in the Caucasus, the great petroleum district, was sent to the Balkans by a syndicate to inquire into this valuable discovery. He was taken by eager natives to this hole, and a bucket was dropped down at the end of a long rope and drawn up again, brimful of oil.

The expert examined the contents of the bucket, tested it carefully, and then, turning to the assembled natives, he exclaimed: "This is the most wonderful oil well in the world. The petroleum is already refined."

The explanation was, of course, that some enterprising person, not knowing that petroleum comes from the oil wells in a crude state, had carefully placed some ordinary commercial petroleum in the well in the hope that the expert would think there really was an oil well there and offer a big price for the property.

Marriage always changes people, but unfortunately it doesn't always alter them for the better.

Most of the criticism comes from those who have no interest in the matter, one way or another.

The fact that Spanish is the mother tongue of Mexico does not exert any perceptible sentimental appeal.

When a fellow discovers that he has no balance in the bank it's time for him to take a tumble to himself.

Never tell a man who has failed how he might have avoided failure; tell him how he may become successful again.

Twenty million baseballs are made annually in this country. Somebody must hit 'em out of the lot occasionally.

That American Posture league will have less work to do perhaps than it would had it chosen to be an imposture league.

The forest service is co-operating with 54 railroads, mining companies, pole companies, and cities in making tests of wooden ties, timbers, poles, piling and paving blocks which have been given preservative treatments.
