Printing Point Does Not Bob Up and Down

In an L. C. Smith & Bros. Typewriter the point on the paper which is to receive the type impression is stationary at the instant the type hits. The carriage does not bob up and down when the shift is made to write capitals.

Why?

Because the type is shifted—not the carriage.

The only movement of the carriage is back and forth on its closely adjusted ball bearing runways—and this does not take place while the print is being made. There is no lifting of the carriage.

This is one reason why L. C. Smith & Bros. typewriting is free from blurs and every letter in the right place.

Don't Invite Serious Sickness

"A stitch in time saves nine," is an old and trite saying, but it is nevertheless true. Common colds and a constipated condition are the foundation of much serious illness and dread disease that could be avoided if prompt attention were given to the first so-called slight ailment.

Every family can provide prompt treatment for these first attacks of ill health—and every family should be prepared for an emergency by having on hand that standard old family cough syrup, Foley's Honey and Tar Compound, for the relief of coughs, croup, whooping cough, irritated and inflamed throat, tight and sore chest, Eriple and bronchial coughs.

Foley Cathartic Tablets are just the thing for constipation and sluggish bowel movement—a welcome laxative and cleansing cathartic. They do not gripe or cause nausea or inconvenience and are particularly welcome to stout people.
