IF BACKACHEY OR KIDNEYS BOTHER

Eat less meat and take a glass of
Salts to flush out Kidneys—
Drink plenty water.

Uric acid in meat excites the kidneys, they become overworked; get sluggish, ache, and feel like lumps of lead. The urine becomes cloudy; the bladder is irritated, and you may be obliged to seek relief two or three times during the night. When the kidneys clog you must help them flush off the body's urinous waste or you'll be a real sick person shortly. At first you feel a dull misery in the kidney region, you suffer from backache, sick headache, dizziness, stomach gets sour, tongue coated and you feel rheumatic twinges when the weather is bad. Eat less meat, drink lots of water; also get from any pharmacist four ounces of Jad Salts; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to clean clogged kidneys and stimulate them to normal activity, also to neutralize the acids in urine, so it no longer is a source of irritation, thus ending bladder weakness. Jad Salts is inexpensive, cannot injure; makes a delightful effervescent lithia-water drink which everyone should take now and then to keep the kidneys clean and active. Druggists here say they sell lots of Jad Salts to folks who believe in overcoming kidney trouble while it is only trouble.

We are told that all things come to those who wait, but the world is full of waiters.

Andrew Carnegie and Hetty Green are each eighty years old. They are reported as being fairly well contented with their respective lots in life.

Edison predicts that the next war will be fought with machines. The present one, however, is hardly what you could term a hand to hand struggle.

A noted advocate of woman suffrage admits that she proposed to her husband. How the startled man must have blushed as he coyly stammered "Y-yes!"

"The war has resulted in an immense number of important medical discoveries," says an exchange. At present Europe does have the appearance of being the world's greatest dissecting room.
