MANNERS IN JAPAN.

Children Crave Candy, but Will Not Eat It in Public.

One day as I was going along the street in a Japanese town I saw a candy man sitting on a stool beside his cart fashioning delicacies with his two flying thumbs. Taking a ball of candy mixture, he would give it a few pinches, a twist, dab on a red spot, and there would be a fish. Taking up another ball, he would give it a few twists, and he would have a radish. Half a dozen of these he would put into a thumb made candy plate the size of a chocolate wrapper and sell for half a cent.

Buying a plate of tiny delicacies, I gave it to a girl, expecting to see her down it in good old American fashion, but instead of falling on it greedily she made a courtly bow and tore down the street as fast as her wooden shoes would let her. I looked after her in astonishment, thinking that this upset every child theory I had, and determined to try it again. So I waited until the two flying thumbs had molded another delicacy and proffered this to a second child. Down the street she flew, too, her walnut knot of hair wabbling excitedly.

When I bought the third delicacy I gave it to a child that was weighted down with a baby on her back and followed after while she went bobbing down the street, the baby's head rolling heavily. I found her sitting on the floor eating the sirupy fish and candy radishes with many delighted sucks and appreciative grunts. Then I understood. It was not polite to eat on the street, but under her father's gray tile roof it was the height of form to dispose of the sweets with all the gustatory gurglings that her delighted soul wished.—Homer Croy in Leslie's.

A FURRED TONGUE.

It May Mean Wrecked Nerves and Not a Disordered Stomach.

"I suppose that there is no more ineradicable idea in the mind of the doctor than that the furred tongue is essentially an indication of a deranged stomach," writes Sir James Goodhart, consulting physician to Guy's hospital, London, in the London Lancet. Yet, according to Sir James, it is by no means always so. And he goes on to prove it by cases in his own extensive practice.

One of these was of a man in a very responsible position, a leader of men, to whom he had to give orders that had to be obeyed and from whom he had to hear much grumbling; a very hard worker and "the fastest talker I have ever struck," full of energy and playing every ounce of it. He was in splendid health, but suffered from a furred tongue and a bad taste in the mouth. In his case these were not due to the stomach at all, but to a disordered state of nerve control.

"Nervous fears and nervous tastes are common enough, and they deserve a special thought," says Sir James. He believes that man is kept sweet and wholesome largely by nervous control, and when he loses this control "the parts become fevered, the mucous membrane dry, the nerves irritated, and taste is perverted." The men so affected are those who are nervous, anxious, hard workers, taking their work home with them to think about and dream about in bed.

The Human Lobster.

The lobster has always appealed to the Englishman as affording a nickname for his fellow Englishman. "Lobster" was a favorite term of abuse among the Elizabethans, though it is only conjectured that an allusion to red faces was conveyed. As signifying a soldier, "lobster" originated in the civil war, being applied to the Roundhead cuirassiers, as Clarendon explains, "because of the bright iron shells with which they were covered." Afterward the allusion was transferred to the soldier's red uniform. But that was the "boiled lobster." The "raw lobster" was naturally the man in blue, the policeman. In earlier days we find Grose explaining that "to boil one's lobster" meant for a clergyman to become a soldier.—London Chronicle.

Coughs and Colds are Dangerous

Few of us realize the danger of Coughs and Colds. We consider them common and harmless ailments. However statistics tell us every third person dies of a lung ailment. Dangerous Bronchial and Lung Disease follow a neglected cold. As your body struggles against cold germs, no better aid can be had than Dr. King's New Discovery. Its merit has been tested by old and young. In use over 45 years. Get a bottle to-day. Avoid the risk of serious Lung ailments. Druggists.

Danger Signal

If the fire bell should ring would you run and stop it or go and help to put out the fire? It is much the same way with a cough. A cough is a danger signal as much as a fire bell. You should no more try to suppress it than to stop a fire bell when it is ringing, but should cure the disease that causes the coughing. This can nearly always be done by taking Chamberlain's Cough Remedy. Many have used it with the most beneficial results. It is especially valuable for the persistent cough that so often follows a bad cold or attack of the grip. Mrs. Thomas Beeching, Andrews, Ind., writes: "During the winter my husband takes cold easily and coughs and coughs. Chamberlain's Cough Remedy is the best medicine for breaking up these attacks and you cannot get him to take any other." Obtainable everywhere.

SAGE TEA TURNS GRAY HAIR DARK

It's Grandmother's recipe to bring color, lustre and thickness to gray when faded, streaked or gray.

That beautiful, even shade of dark, glossy hair can only be had by brewing a mixture of Sage Tea and Sulphur. Your hair is your charm. It makes or mars the face. When it fades, turns gray, streaked and looks dry, wispy and scraggly, just an application or two of Sage and Sulphur enhances its appearance a hundredfold.

Don't bother to prepare the tonic; you can get from any drug store a 50 cent bottle of "Wyeth's Sage and Sulphur Hair Remedy," ready to use. This can always be depended upon to bring back the natural color, thickness and lustre of your hair and remove dandruff, stop scalp itching and falling hair. Everybody uses "Wyeth's" Sage and Sulphur because it darkens so naturally and evenly that nobody can tell it has been applied. You simply dampen a sponge or soft brush with it and draw this through the hair, taking one small strand at a time; by morning the gray hair has disappeared, and after another application it becomes beautifully dark and appears glossy, lustrous and abundant.

WAR UPON PAIN

Pain is a visitor to every home and usually it comes quite unexpectedly. But you are prepared for every emergency if you keep a small bottle of Sloan's Liniment handy. It is the greatest pain killer ever discovered. Simply laid on the skin — no rubbing required—it drives the pain away. It is really wonderful.

Mervin H. Solster, Berkeley, Cal., writes: "Last Saturday, after tramping around the Panama Exposition with wet feet, I came home with my neck so stiff that I couldn't turn.
