DIGBY BELL FINE ADE PLAY

Did you ever play roulette? If you have or if you have not, you will enjoy "Father and the Boys," George Ade's scintillating five-reel photoplay which is now showing at the Arcade with Digby Bell, the veteran Broadway comedian, in the leading role. One of the most exciting episodes in the Broadway Universal Feature centers around a roulette game in which dad, in the role of a foxy grandpa, shows his two sons how to play the ancient game. Incidentally dad breaks the bank, cleans out a polished scoundrel and runs off with the prettiest girl at the polite gambling party, to which he hadn't been invited because he was considered an old fogey. "Father and the Boys" is a delightful comedy which will please the older generation and tip the younger fellows off to keep an eye on dad.

CURIOUS JAPANESE RITE.

The Art of Divination Through the Use of Tortoise Shell. The curious art of divination through the medium of tortoise shell is very popular throughout the island kingdom, being used upon many occasions to ascertain the timeliness or possibility of various projects. The importance of this practice in the eyes of the Japanese may be inferred from the fact that the fields in which the sacred rice for the coronation ceremony was grown were selected through tortoise shell divination. This is not the earliest form of divination known in Japan. Previously there was a kind called Futomani, in which the shoulder blade of a stag was used in place of a tortoise shell. The tortoise shell method, which probably came from China, was considered an improvement and was probably adopted because it was something new, for at that time the Japanese were seizing upon all things foreign.—Japanese Magazine.

OLD TIME WITCH FINDERS.

Sure Signs by Which Agents of the Evil One Were Detected. Three hundred years ago the business of finding out witches was well established and accepted in courts of law as highly proper. In 1640 it is recorded that the magistrates of Newcastle, England, sent to Scotland for an expert witch finder. This gifted person proceeded to show his skill by quickly discovering fifteen witches and securing their conviction. One Matthew Hopkins was a celebrated witch finder of that period. It was easy to discover witches when you knew how. The suspected person could be forced to weep and then detected by the well known fact that a witch could shed only three tears and those from the left eye, or she could be pricked with pins to discover the spot insensible to pain, which was a sure sign of dealings with the devil. That women were far more likely to dabble in witchcraft than men was conceded. The reason was satisfactorily explained by a famous German text book on witches published in the fifteenth century. It was simply that women were inherently wicked, whereas men naturally inclined to goodness.—Exchange.
