

Coffee

Extravagance isn't in good coffee; it's in wasting sugar and cream and time on poor coffee!

Poor coffee—extravagant at any price. None of the full, rich flavor in it—it isn't worth packing in such airtight tins as seal in all the fine flavor of Schilling's Best.

These tins have made fine coffee economical.

Schilling's Best

We Were Skeptical About Machine Bookkeeping

How the makers of the well-known Rubberset Brushes met a serious bookkeeping problem due to growth of business

By C. M. FREEMAN
Treasurer of the Rubberset Company, Newark, N. J.

WITH the growth of our business, accounts had multiplied and bookkeeping had become more and more of a problem. Something had to be done, but you know how hard it is for a business concern to consider a new move in its bookkeeping and accounting work—even when its executives know that something of the sort is needed badly.

Something was Lacking in Our Bookkeeping

That was evident to me because statements didn't get out until the 10th of the month—and so all our posting had to be done in the three weeks that were left. A trial balance was hard to get, and statements kept our bookkeepers working overtime for a week or two every month. Prompt relief was necessary.

Interested in Mechanical Way of Handling Figures

Because of my previous connection, and the knowledge I had about the use of Burroughs Machines, I immediately thought about solving this problem mechanically instead of increasing our office force.

However, the familiar question came up at once: "It may be all right for a bank, but will it fit our kind of business?"

Frankly, I was skeptical, but resolved to look into the possibilities. We therefore investigated the subject of mechanical bookkeeping from every possible angle.

A Surprising Demonstration

We tried a Burroughs Machine on our statement work one month when we were particularly rushed. Although we didn't get started until close to the end of the month, we had all the statements out on the first.

This meant a lot to us—because, of course, early statements mean prompt payments.

I was still skeptical, however, about posting our ledgers by machine.

In the Rubberset Co. office cards and ledgers are kept posted up to the minute with a Burroughs

The Burroughs handles either loose-leaf or card ledgers. It can be adapted to your method

We felt that we would have to be "shown" our complete satisfaction before making what seemed, at that time, so radical a change in our bookkeeping.

It was true that for several years the Rubberset Company had used a Burroughs for straight adding and figuring work. It had proved to be a good investment and we decided to take the word of the Burroughs Company that their Ledger Posting and Statement Machine would prove an even better investment.

The Machine Makes Good

Once we had the Burroughs at work in our office, the day of skepticism was over.

Our statements are in the mail at 7:30 p. m. on the last day of every month.

Absolute accuracy eliminates all chance for complaints from our customers.

Trial balance troubles have vanished.

Ledgers are always posted up to date and our bookkeepers are never overworked.

The same Burroughs that posts our ledgers does all the other figure-listing, adding and subtracting work of our office.

And with the Burroughs we know that our books and figures are right.

A year and a half of experience makes me feel sure that mechanical ledger-posting is the method which will soon be employed by all progressive business houses.

We are glad we did not delay longer in employing a Burroughs Ledger Posting and Statement Machine to keep our books.

There are 98 different models of Burroughs Bookkeeping and Figuring Machines. Among them is one that will just fit your business needs. For your bookkeeping troubles, there's an easy Burroughs-way out. Get in touch with one of our branch offices in 170 cities. Your telephone book or your banker will tell you the nearest. Or, write to Burroughs, Detroit, Michigan.

FIGURING AND BOOKKEEPING MACHINES PREVENT COSTLY ERRORS—SAVE VALUABLE TIME
