Washington, March 28.—Dr. Walter F. Rittman, scientist in the U. S. Bureau of Mines, has given to the United States and the world a practical plan for trebling the amount of gasoline that may be produced from crude oil.

Because I had a strong body, through to endure long, hard strains, I was able to work thirty-six hours at a stretch when necessary."

My processes were not over-night inspirations. They are the result of straight scientific research involving the use of calculus, physics, and chemistry.

In addition to enabling independent oil operators to secure three times the amount of gasoline from crude oil that was possible under old systems.

As The Years Pass

Every individual faces declining years and diminished earning capacity. Statistics show that only five men out of each one hundred are able to live on their incomes at the age of sixty. The other ninety and five are dependent upon their daily earnings, then relatives, friends or public charity for support.

A Savings Account consistently maintained in The United States National Bank and earning 4 per cent interest, is a most effective means of preparing for independence and comfort in later years.
