Hupmobile
Our conviction is that the Hupmobile represents the world's finest expression of the four-cylinder principle.
That principle—which is giving entire satisfaction to nearly 85 per cent of the motor car buyers of America—has been the basis of Hupmobile engineering for seven years.
We have developed "the best car of its class in the world," with a dependable, simple motor, noted for swift pick-up, high-gear flexibility, and abundant power with smoothness and silence.
That is why Hupmobile sales stand now at the highest point yet recorded in the car's career, and why they are steadily climbing.

BIG ORCHESTRA TO PLAY

VESPER SERVICES SUNDAY TO BE UNIQUE.

About 25 Pieces Will Participate in Delightful Program.

Between 22 and 25 pieces of string and horn instruments, under the direction of Prof. Henline, a member of the high school faculty, will play at vesper services in the Methodist church Sunday evening at 4 o'clock. Many of the members of the orchestra, one of the largest ever gathered in this city, are high school students. Not all are, however. The violin section, containing several ladies, number about six, and the other sections are correspondingly large. Prof. Henline has been coaching these players diligently until they now handle their parts very well. No admission will be charged for the vesper services, but a collection will be taken to defray expenses of the music.

That the orchestra handles music of merit is noticed from the fact that the opening number of the program a march overture, "Shadowland" (Gilbert) was on the Walter Damrosch symphony orchestra program at Portland last Sunday.

Keep the Money at Home
It is to your own interest to trade at home. Suppose the mail-order houses should sell cheaper and everybody should order goods from them—the local stores would be no more. Remember, a store cannot be kept up with the small purchases if the money is sent away for the big things. You have then succeeded in ruining your home trade; you have then helped to build up an enormous corporation in some distant city.
The lessened home consumption and market would decrease the value of your farms and homes. Send your money away, you get nothing back, but goods; spend it at home and it will come back to you in better towns, better stores, better schools, better churches, and better social advantages.
The Home Dealer helps to keep up the schools and churches. He contributes his share for good roads and other public enterprises.
