

Prompt Treatment of Kidney Troubles

Kidney ailments often start without causing much discomfort. For this reason people are apt to neglect treatment.

The kidneys, the filters of the blood, should never be neglected.

Backache, sluggish action of the kidneys, etc., denote that something is wrong.

A. D. S. "KIDNEY-CURE"

regulates and restores the kidneys to their normal condition and allays all bladder inflammation.

Use it now if you have any symptoms of kidney trouble.

Mrs. Frank Pedro Asks for Divorce. Pendleton, July 5.—Asking for divorce, \$15,000 alimony, \$100 a month and an additional \$50 a month for the care of a daughter, Mrs. Flora M. Pedro has filed suit in the Circuit Court against Frank V. Pedro. Other members of the family and business connections are named as defendants in the claim for alimony. Cruel and inhuman treatment are charged.

The complaint alleges that, 19 years ago, the defendant lost his temper and seized her by the throat, scratched her face and called her vile names, that, 6 years ago, he frightened her and her children and ran them out of the home; that three months ago he roughly pushed her out of the kitchen door and at one time threatened to kill himself and her with a revolver.

It is alleged that he told the plaintiff she would have to live on \$40 a month with her children. It is averred that with Manuel Pedro, a brother, the defendant has been conspiring against the plaintiff and has kept their business relations secret from her so that they might cheat and defraud her. Most of the property it is alleged is held in the name of Manuel Pedro but a half interest is held by Frank V. Pedro.

The property interests of the brothers is estimated at between \$175,000 and \$250,000 most of which is represented by land and sheep.

The couple were married in Pendleton June 21, 1894, and have three children, Josie, Mrs. Agnes Hinkle and Marguerita. The plaintiff, through her attorney, Will M. Peterson, asks for the custody of the minor children, \$15,000 alimony, \$600 a year for the care of Marguerita, \$100 a month for her own use as long as she remains unmarried and \$1000 suit money.

Would Provide Cottage for Teachers.

New York, July 6.—National aid for state normal schools, higher salaries and better pension systems for teachers and better means of safeguarding women in co-educational colleges, were the problems discussed by the National Education association in Madison-Square Garden here today. President J. W. Crabtree of the State Normal School, River Falls,

Wisconsin, insisted that schools and colleges of education have been unable to meet the demand for trained specialists because they have been "bound and gagged by college practices, traditions and prejudices." The normal school he declares is a national asset even more so than the state agricultural college and should be so treated by the national government in the distribution of national aid for education.

President Joseph Swain of Swarthmore college advocated a reasonable salary increase and a joint teacher assessment and public taxation plan of pensioning public school teachers. Josephine Corlies Preston, superintendent of public instruction of the state of Washington, outlined a definite plan by which cottage homes for teachers may be provided in every rural school district.

The progress in Chinese education was discussed by V. K. Wellington Koo, ambassador from China to the United States. Mary Beal Honsel, dean of women, Mt. Union college, Alliance, Ohio, in an address before the conference of deans of women, advocated a close supervision of the recreation hours of women as of their busy hours in co-educational institutions. The nominating committee elected by the delegates from all states, will report the officers for the ensuing year at the general session tomorrow.

Sommer Hotel Guests.

Stella and Claire Mastrude, Joseph; H. M. Reiff, Portland; C. P. Ragsdale and wife, Joseph; Mr. and Mrs. J. B. Servi, Chicago; W. H. Burnett, Pendleton; E. B. Budge, San Francisco; A. J. Mayfield, Portland; T. W. Kelly, San Francisco; Mrs. G. G. Conley, Cove; J. A. Burleigh and family, Enterprise; R. W. Frame, Portland; Mrs. Bob Fitzsimmons, Los Angeles; Edgar Marvin, Enterprise; A. Wickens, Enterprise; Hugo Nelson, Spokane; Frank Hilton and wife, Nampa; J. M. Ross and wife, Walla Walla; E. C. Skiles, Seattle; Bruce Cox, Wallawa.

Savoy Hotel Guests.

Barnes, Haines; Frank Perry, Island City.

BEWARE, DOGS!

Commission Instructs Officials to Spare No Untagged Dogs.

In preparation for the usual mid-summer campaign on untagged dogs, the commission last evening ordered City Manager Laffy and Police Ardrey to proceed with dispatch against untagged and untagged dogs. Rabies scares always develop about this time of the year, and it is supposed to get an early start in preparedness for such eventualities.

GLOBES IN NATURE

Why Raindrops and the Planets and Suns Are Round.

THE FORCES OF ATTRACTION.

As a Crowd Gathers in a Circle Around an Object of Interest, So Molecular and Gravitational Impulses in Matter Act Toward a Center.

Falling rain forms into spherical drops for the same reason that the earth has become a globe—namely, because that is the shape in which the internal forces of attraction attain a balance. In the case of a very large and massive body like the earth it is the attraction of gravitation that controls the form, but in that of a small body like a raindrop it is the molecular attraction of the infinitesimal particles.

The intensity of molecular attraction, which is the force that holds the components of bodies together, is far greater than that of the attraction of gravitation, but it is exercised over a comparatively insignificant distance. In each case, however, the resultant of all the attractions between the individual particles is a force directed toward the center of mass.

But by the principle of inertia time is always required for any force or combination of forces to set matter in motion. The larger the volume of matter concerned the longer will be the time needed for the internal forces to group all the particles symmetrically around their common center of mass.

It is upon this principle that the old fashioned shot towers are operated. Molten lead is dropped from a great elevation after passing through a sieve to facilitate its separation into small masses, and during their downward flight these masses are rounded into little spheres by the mutual attraction of their molecules, which group themselves around a common center.

With very large bodies not broken up into small portions the gravitational force plays the principal part in shaping them, because gravitation is effective at great distances and throughout vast masses, while cohesion, or molecular attraction, is extremely limited with regard to the space over which it acts.

Each molecule attracts a little group of other molecules close around it, and these in turn attract their immediate neighbors. Within the space occupied by a raindrop the molecular attraction is the master force and quickly shapes the mass into a sphere.

And just as a spoonful of water thrown from a high tower will descend in the form of one or more round drops owing to the resultant pull of all its molecules toward a common center so the entire ocean if it were flung out into open space would become a gigantic ball of water rounded into that shape by the gravitational attraction acting throughout its whole mass.

It is by no accident that all the planets are spherical. They have taken that shape as inevitably as a loose stone rolls down a steep hill. Their forms are not perfect spheres, because they have been subjected to outside disturbing forces, such as the centrifugal effects of their rotation on their axes and the deformations produced by the attraction of other planets and of the sun. Even the heads of comets are spheroidal, although they are believed to consist of swarms of small bodies like meteors.

This tendency of masses, whose component parts or particles are free to move among one another, to assume a globular outline, is curiously illustrated even by crowds or swarms of sentient beings. Thus a swarm of bees when it gathers close becomes spherical or spheroidal, since that form is best suited to inclose the greatest number of individuals.

A human crowd certainly would take a spherical form if its members were able to choose their positions as freely in up and down as in horizontal space. Being confined to one level, they arrange themselves in a circle, which is the section of a sphere.—Garrett P. Serviss in New York Journal.

Political Chances.

"I see when a man runs for office he has to put himself in the hands of his friends."

"Yes, my dear."

"If a woman ran would she have to put herself in the hands of her woman friends?"

"I suppose so."

"Well, I do not imagine many women will run. Think of taking such chances!"—Louisville Courier-Journal.

Not a Bad Error.

She (with newspaper)—Here's a funny mistake in the report of that affair last night. It says that Mrs. Swellman appeared in a handsome "ampere" gown, instead of "empire." He—Well, "ampere" isn't very far off; her gown was a bit shocking.—Boston Transcript.

A Pleasure.

"I put through a big financial deal last week," remarked Mr. Dustin Stax.

"I thought you said you were going on a pleasure trip."

"Could there be any pleasure greater than putting through a big financial deal?"—Washington Star.

Obliging.

"Walter, the steak is so tough I can't cut it with this knife."

"Very good, sir—I'll bring you an other knife, sir."—Columbia Jester.

To encourage talent is to create it.—Lessing.

Auto Plunges Over Grade

Roseburg, Or., July 5.—The only fourth of July accident in Douglas county occurred at Roberts mountain yesterday when J. C. Kaegi, a Wilbur merchant, and his family drove over an elbow turn on the south side of the mountain while climbing the grade. The large auto plunged down the side of the mountain 75 feet and turned over on the occupants. All except two were pinned down, but not a bone was broken, though all were badly bruised.

Wedding Anniversary Is Date of Woman's Death

Salem, Or., July 5.—Seized with an attack of heart disease, Mrs. Emma T. Ide dropped dead at her home here yesterday afternoon while preparing dinner for her 32d wedding anniversary. She was 52 years old, and is survived by the husband, T. H. Ide, and three daughters, Miss Jennie Ide, Salem; Mrs. Effie Rockhill, Newton, and Mrs. Jennie Steustrom, Turner.
