HIGH SCHOOL SEMESTER PROGRAM IS MADE
(Continued From Page One)

students who have credit in History I (1). Civics: The history and function of federal, state and municipal government; citizenship, party organization, and social problems of the day. (Open to Seniors who have credit in History IV.)

German Department.
German I: Completion of the grammar and the reading and the memorizing of some simple well-known German poems, and the reading of some simple German mythology and history.

German II: The completion of the reading of a descriptive tour to Germany, the reading of three stories, one a romance, one a story of German Student Life and one a legend, composition work and the completion of a notebook of synonyms, derivatives, and idioms.

Latin Department.
Latin I: The purpose of the first year's work is the thorough mastery of forms and the fundamentals of grammar. Attention is given to translation also, both Latin into English and English into Latin.

Latin II, (1): Caesar's Bellum Helveticum—Translation with constant review of grammar, and much work in construction.

Latin II, (2): Continuation of I with more translation.
Latin III: Cicero's Orations—Translation with intensive study of one oration for form and content—some conversation in Latin and occasional grammar reviews.

Latin IV: Virgil Aeneid—Grammar and construction work only as it seems necessary. The aim of this course is appreciation of the poem as literature. Attention is given to diction and poetic forms, and to the customs, traditions and mythology of the Romans.

Elocution: This course is intended primarily as preparatory work for the Senior play and is therefore open to Seniors only. The aim is to teach the pupil to appear properly in public. Among other things, the rules for staging and dramatic action are taken up. Credit is given to those who, in addition to the regular class work, make three formal appearances before the student body.

Domestic Science and Art Department.
The following is an outline of the beginning sewing class:

Dish towel—Gives four hems, kinds, uses and care of towels; sewing apron or collar and cuff set; rolled hem, decoration with lace, study of cotton. Laundry or dress bag—Machine stitching, three kinds of seams, care of clothing, study of spinning.

Envelope combination suit or chemise—Selection and trimming of underwear, construction, care, economics and social problems.

Study of Wearing Lingerie Waist—Fine cotton material, fitting, finishing, trimming, hygiene of clothing.

The second semester takes up garment making a little more extensively and the last problem of the year is a gingham dress or some other firm wash materials.

Cooking starts the second year. This course consists of plain cooking, planning and serving of meals, dietetics and household management applied practically in managing the cafeteria. The third year takes up advanced cooking which involves some fancy cooking, invalid cooking, advanced dietetics, house construction and decoration, laundering and home nursing.

The Seniors' work is wholly dress-making. Their first problem is a tailored skirt of cotton material. In it all the loose ends are gathered up and their Freshman work brought more vividly to mind. Next they take up the problem of the wool dress. The second semester is spent in preparing their clothes for graduation. The last problem is graduation dress.

Special stress is laid throughout the course on economics, the care and renovation of the clothes.

Industrial Arts Department.
Freshmen elementary cabinet making; mechanical drawing.

SHERRY'S

Gladys Brockwell, La Grande Girl, Appears in the Strong Play "Sins of Her Parent."

Two figures stand out in sharp contrast in the William Fox photoplay starring Gladys Brockwell, "Sins of Her Parent." On the one hand is the southerner, the man of proud family, who will not see his name dragged in the dust; on the other is the girl, who loves the Southerner's son, and cannot marry him because of her own uncertain birth. The struggle between these two, and the final agreement of their views in the presence of an heroic woman, form the thread of the story.

Gladys Brockwell is well known in La Grande, having lived here some time and was married here. Many La Granders recognized her last night and were delighted with her wonderful acting.

Last night tonight.

Carpentry and repair work; concrete construction.

Cabinet making; advanced mechanical drawing.

Elementary architectural drawing; tracing and blueprinting.

The department and members of the carpentry class would be glad to accept an offer to build a garage, chicken coop or some simple problem of like nature. The boys would draw the plans and submit them for approval. The owner is asked but to buy the cost of material.

General Science Department.

The courses offered in the Science Department consist of General Science in the Freshman year followed successively in the remaining years by Biology, Physics and Chemistry.

General Science aims, in an elementary manner, to open up to the beginner the broad field of science by arousing interest in the every-day phenomena of his environment, and the scientific interpretation of these. In brief it answers the how and the why at a time when the child's mind is alert in this direction. This necessarily supplies a background for the later study of the differentiated sciences for those whose inclination and opportunity permit.

Sciences must overlap and especially is this true in high school work, but one basic principle underlies them all—namely, their application to the problems of every-day life. Each science plays its own role in this respect.

Biology is a fundamental science of the present day. It is very essential that man should understand life. Biology consists of a study of plants, animals, and man, and might thus be called a combination of Botany, Zoology, and Human Physiology.

In the first semester the course takes up a study of type plants and the close relationship between plants and animals, and thus with man. The second semester continues the study of type animals and of man. Particular emphasis is placed upon the absolute interdependence existing between all forms of life, and the many points of resemblance between all types and functions existing in life.

In physics the first semester is taken up with phenomena associated with gases, liquids, and solids, the principle of work and machines, heat and its industrial applications. This is followed in the second semester by magnetism, electricity, sound, and light. A few modern theories are discussed. In no other branch of science is there more constant application to every-day life, and this is strongly emphasized. The relation of Physics to modern inventions makes the subject all the more vital.

A similar treatment is made of Chemistry. The common elements and their compounds are studied. Particular emphasis is placed upon the chemistry of the air, water and its purification, the relation of chemistry to modern industry and the home.

All science courses are abundantly supplemented with laboratory work, occupying nearly half of the student's time.

The Whipp Concert.
Hartridge Whipp, Oregon's noted baritone, accompanied by Leonora Fisher Whipp, will give a song recital at the Methodist Episcopal church on Tuesday evening January 30. Conrad Bos, the well known vocal coach and accompanist who recently appeared in Portland as accompanist with Madame Julia Culp, the famous Dutch Lieder singer and with whom Mr. Whipp had four lessons, said "Mr. Whipp's voice is perfectly placed and I predict for this young man a wonderful career as a concert and operatic artist."

Gentlemen Tramps Go To Buffalo Convention

Cleveland, Jan. 19.—(United Press)—On foot, by freight, and, maybe by passenger coach, 200 delegates are heading for Buffalo to attend the national convention of the American Council of Migratory Workers of the World. In other words the gentlemen tramps of America.

Murray Youtz, national secretary,

A MAN
IS WHAT HE FEEDS ON

The better his food the better is the man who eats it. A man who wishes to be healthy will buy his foods where he knows he will get them pure and high grade, and our reputation for Reliability in this Line is unquestioned. Our canned goods are the best put up, our cereals and foods are from the choicest kernals, and our fancy and staple goods are without a peer.

Harris Grocery

whose office is in Cleveland, explained today that it is impossible to fix the exact time for the convention. Uncertain arrival of delegates will determine the starting time. When they reach Buffalo the convention will begin. This probably will be within the next two weeks.

The council is working for government ownership of railroads, employment of the unemployed by the government on public improvements; free transportation of workmen to where needed; municipal ownership of food supply and cheap loans by the government.

ARCADE

BLANCHE SWEET IN DRAMA OF SOUTHERN PRISON CAMPS

Blanche Sweet, the Lasky star, will be seen at the Arcade Theatre today and tomorrow in "Unprotected," a thrilling drama of the southern prison camps, written especially for her by James Hatton.

At Arcade Today and Tomorrow.

BLANCHE SWEET and THEODORE ROBERTS in "UNPROTECTED" (LASKY)

There is no other artist on the photodramatic screen who has the versatility and is able to run the gamut of characters as ably as does Miss Sweet. She has, in her excellent manner, depicted characters of all nationalities and in all walks of life. She has been seen as a child of the slums and as a princess, a Swedish maid-of-all-work in a college boarding house and as a Montenegrin peasant. In "Unprotected" she portrays the most striking and unusual character of her entire career—that of a beautiful young artist, leased with other convict laborers and sentenced to

work in a turpentine camp. As an orphan girl she goes to live with her frail uncle who refuses to permit her to indulge in her artistic inclinations. An accident befalls the old man in which he is killed and she is sentenced to ten years in prison, and leased out to a private firm to work with the riff-raff of the state in one of the huge turpentine camps.

How, as a young artist, she meets the son of the governor—how he falls in love with her and although she is convicted under a different name,

finds her just as she is about to fall into the clutches of the owner of the camp—how the convicts rebel against the treatment—and how they are finally saved from worse than death by her pleas for them to the governor, makes a story absolutely unique in motion picture annals.

Miss Sweet is surrounded by an all-star cast headed by Theodore Roberts. Others in the cast are Tom Forman, who has been Miss Sweet's leading man in many of her productions, Ernest Jay, Walter Long, Mrs. Lewis McCord, Robert Gray and Jane Wolff. "Unprotected" is a Paramount picture.
