Film Notes

Myrtle Stedman, who is the champion all-around charity entertainer of the Pacific Coast, has been spending every moment of her spare time for the last two weeks in work of this kind. The Morosen-Paramount star has a beautiful soprano voice and is constantly in demand for church entertainments and various charitable functions.

The price of oil stoves is rising rapidly in Los Angeles. Vivian Martin, Morosen-Paramount star, who is now at work under the direction of Howard Estabrook in the direct course of the sudden demand for oil stoves. The majority of her scenes are exteriors and when a cold spell hits the studio, the star proceeded to take a stove out on location with her. Thereupon the rest of the company scurried around and procured personal heaters. Hence the sudden rise in Standard Oil stock.

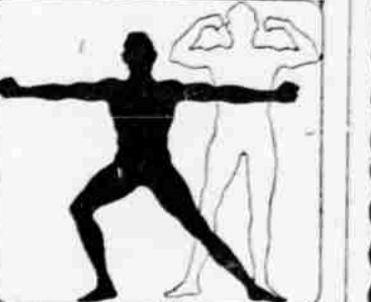

There is one "Venus" less in this world than there was a week ago. This particular one came to pose for some scenes in George Behan's next Morosen-Paramount picture. It was a very cold day and when "Venus" was called by director Donald Crisp, she stuck her nose out of her dressing room, gasped, and retreated with a shiver. She refused to appear unless the studio was heated in some manner. That was impossible on such short notice, but Behan conceived the brilliant idea of substituting a small stove for the pedestal on which Venus was to pose. The arrangement was completed without consulting the lady herself and when she stepped on the concealed stove with her unadorned feet, a look of bewildered indignation suffused her lovely features. Then she emitted a shriek and bounded off the pedestal, disappearing into her dressing room with a wall of injured dignity. As a result of the experiment Behan lost his Venus, for she refused to risk encountering any more of the star's ingenious inventions.

House Peters is acquiring a reputation as a little joker. He asked an extra for a match while waiting for a scene at the Morosen-Paramount studio. The extra, evidently taking Peters for a brother extra, said: "When I first saw you, I thought you were House Peters. He's a darn good actor—ever seen him on the screen?" "Yes, I've seen him on the screen," replied Peters with gravity, "and I don't think he is any better than I am."

A fibre mat has been invented that is intended to be clamped to an automobile running board to enable riders to cleanse their shoes before entering a car.

The largest settlement in Greenland has a population of less than 800.

UNCLE SAM TELLS HOW YOU CAN GET STRONG

Constant practice at the following exercise will produce strong, flexible muscles of the arms and legs, straight shoulders and back and a reduced abdomen.

Standing at attention, flex arms over shoulders with lateral motion, knuckles to the rear, hands closed, as shown by outline.

Lunge sideward to right and extend arms to side horizontal, knuckles to the rear.

Resume first position, then attention.

Repeat left, right, left.

EXERCISES BEGIN AND END AT "ATTENTION."

The Board of Health is armed with full power, and tearing down the notices is heavily penalized. It is only fair to say that it is not found necessary to make use of the system in many instances, but it has proved effective in stimulating among people generally a new desire for an attractive city—which we all want, if our attention is called to it.

The force of example is contagious as anyone who have traveled will realize, there being some cities that are clean by habit and others that are quite the reverse, and from the same cause.—The Oregonian.

Better Milk and Why

Because we have supervision over the cows, barns, manner of milking and the handling of the milk up to the time it is received into our modern and sanitary plant.

After the milk reaches us we have up-to-date machinery for washing, rinsing and sterilizing the bottles—A very important feature.

Our milk is bottled by machinery in especially prepared apartment, cement floor with proper drainage and sewer connections, sanitary walls and ceilings with an abundance of steam to clean and sterilize all machinery immediately after using.

La Grande never had such thorough and sanitary service as we are giving you. You know you eventually will be our patron—Begin now.

MODART CORSETS

Front Laced

SOLID COMFORT
Standing, Sitting or Lying Down

When you stop to think that you spend between five and six thousand hours every year in your corset, you must realize how important it is that you have a perfectly comfortable corset. A poorly fitting corset frequently leads to severe nervous and organic troubles which cause years of suffering. In the MODART Corset we have a garment that always gives genuine comfort, sitting, standing or lying down.

SHERRY'S

Wealth of World In America, Says Rockefeller Scion

SHERRY'S Today and Tomorrow.

He loves peace so much that he fights for it!

That is the character of Liah Henley, the part taken by George Walsh, in his new William Fox photoplay, "The Mediator." The picture tells a western story that is different, and it tells it in an original manner. Juanita Hansen, favorite of millions of movie fans, plays opposite Mr. Walsh. Liah starts his adventures by shooting and wounding the bully of the place where he lives. Then he is so sorry for him that he sends flowers to the hospital. Later, Liah hears of a town called Peaceful Hill, and he knows it's the place for him.

On his journey to the new home, he meets with a bunch of strikers. The turmoil of the mining town troubles him, and he ends the strike by beating the leader.

Then follows a series of encounters between Liah and the leader, in all of which the Mediator's prevailing motive is to keep the peace. When he has licked everybody in the neighborhood, he finds the quiet he has sought. He finds something else, too.

It is Maggie, the waitress, who had helped him in his schemes.

Roy Norton, author of the story of "The Mediator," George Walsh's new photoplay for William Fox, was also author of "The Plunderer," a former Fox picture. Mr. Norton himself lived the life of the wild west in its days of pristine glory, and he knows the characters he depicts. That was why he was able to put so much red blood and quaint good humor into the story of the film which Otis Turner directed.

Norton was among the first of those restless spirits who were argonauts of the Klondike. But he was unlike many of those restless spirits who left their bones among the snows of Alaska. Norton struck it right, and he now owns Blue Devil, one of the richest mines in the Yakon district. It has an annual output of about \$95,000. Consequently, Norton is able to take his time about writing books.

A pneumatic hammer for tamping paving stones has been invented.

Photo by American Press Association. PERCY A. ROCKEFELLER.

Mr. Rockefeller, who is now thirty-eight years old, is the second son of William Rockefeller and a nephew of John D. Sr. He was educated at Yale and after his graduation became an employee of the Standard Oil company. He entered, not as his father's son, but as an ordinary worker. Since then he has worked his way to a position of great responsibility and importance.

Holland's production of butter, which amounts to about 154,000,000 pounds annually, is controlled by the government so as to practically insure its purity.
