The Test of Equipment

From the Pittsburgh Gazette-Times. With an eye on the Roumanian affair, it is evident you never can tell how many machine guns a nation has until it starts to give them up to the Germans.

Last year the stock of the Midvale Steel and Ordnance Company netted 32 per cent after the huge sum of \$3,525,579 was set aside for depreciation.—Oregon Labor Press.

CARPENTIER MAKES POOR SHOWING AS A PUGILIST

BY H. C. HAMILTON
(United Press Staff Correspondent.)
New York, Feb. 9.—Life in the trenches and wounds received in aeroplane combats, according to recent reports received from Paris, have made the condition of George Carpentier such that he would have trouble getting in condition for a real bout inside of six months. A recent interview from the United Press representative in Paris quoted Carpentier as saying he would not be able to fight in this country within four months.

Carpentier's appearance, while ostensibly for the purpose of raising funds for the family of a French pugilist who was killed in action, undoubtedly had with it the experiment

of determining the real condition of the European champion. He boxed four rounds and when he finished he was puffing hard.

He boxed well, but his movements were decidedly clumsy compared to his former fast-shifting self.

Carpentier is through for a long time. It will take a year for him to get back into condition. War effects, his injuries received in a fall will make it impossible for him to be really in shape.

Talk of a match with Jess Willard was foolish from the start, in spite of the fact that every tentative arrangement had been made. Talk of a bout with Les Darcy or any other good light heavyweight is just as foolish.

To send Carpentier into action now against a really good man would be slaughter. He would tire within six rounds at the most and all his ring craft could not save him from defeat. It is the price he has paid for being a patriot. Even if he is not killed or permanently crippled in action, the chances are he never will occupy the place in fistiana he once enjoyed.

GIVE YOUR HENS AN EGG TO SIT ON

Washington, D. C., Feb. 9.—(United Press)—This is the best day to put eggs under your biggest and most amiable hen, or into your incubator. In a special announcement to farmers—urban and suburban—the United States department of agriculture today declared best results are to be obtained toward a satisfactory production of eggs during fall and early winter if arrangements are made to hatch pullets in March and April.

Birds hatched from four to eight weeks from today, the announcement says, will be well matured and ready for laying 5, 6 or 7-cent eggs early in the fall. And a greater portion of them will go broody early in the following spring, thus completing the circle necessary for production in the fall.

Sneezing.

Is a grip germ's way of expressing its soul; and the prize man pays for having a nose. It is superinduced by snuff, red pepper and Russian conversation.

A sneeze in New York is only a sneeze, but a sneeze in Russia is language. Don't sneeze there unless you know what you're talking about.

That's one advantage Russian prisoners have in Germany: Nobody can tell whether they're cursing the kaiser or just have a bad cold.

All humans are equipped with sneezers. Most sneezers are single shot, but occasionally you find a man who fires both barrels at once.
