## MARMON 34

**THE LEADING FACTOR IN  
MOTOR CAR ADVANCEMENT**

**THIS** is the car that brought a new method of construction. It was three years in building, but when it was introduced at the motor shows last year it held the center of attraction.

Experts were quick to stamp it with approval. It was bought by more engineers and officials of the motor car industry than any major class car. Still the question was asked by many motor car buyers, "Will the Marmon make good the remarkable claims of its builders?"

More than a year has passed since that. Now no doubt remains. The Marmon has fulfilled every promise. And its influence has spread to the newer cars being shown.

By scientific selection of materials and proper distribution of weight, Marmon engineers have obtained a degree of balance and consequent riding

and handling ease, unequalled by other cars. The chassis is long and low, with low center of gravity. And it holds to the ground on open roads at extremely high speeds. So comes riding ease without away that authorities hail as an engineering triumph.

All this, remember, in a car that is 1100 pounds lighter and saves from 50 to 75 per cent in gasoline and thousands of miles in tire wear.

To completely appreciate the Marmon's many excellencies, arrange to ride in this car, and talk with Marmon owners.
