

# A big new discovery in cigarette blending

The big thing about Chesterfields is their unique blend. The *Chesterfield blend* is an entirely new combination of tobaccos. This blend is the most important new development in cigarette making in 20 years.

As a result, Chesterfields produce a totally new kind of cigarette enjoyment—they *satisfy!* Just like a "bite" before bedtime *satisfies* when you're hungry.

But with all that, Chesterfields are *MILD*, too!

This new enjoyment (*satisfy*, yet *mild*) comes **ONLY** in Chesterfields because no cigarette maker can copy the *Chesterfield blend*.

### Bomb Plots In U. S. Held Up As Warning Against German Agents In Spain

BY WILBUR S. FORREST. (United Press Staff Correspondent.)

Paris, March 1.—(By Mail)—"A vast army of German agents engaged in surveillance of Spanish ports and shipping" is condemned by the Spanish press and demands made on the government to take steps to get the spies out of the country in papers arriving here today. German bomb plots and intrigue in America are pointed to as examples of what the Spanish government is confronted with. Since Spain's refusal to openly break with Germany as a protest against the submarine blockade, the Spanish press, except the Germanophile organs, is open in its criticism. The objecting papers carry lengthy and detailed revelations of the methods of German agents working in conjunction with the submarines. El Liberal, the great newspaper of Madrid, leads in openly declaring that no ship now leaves a Spanish port before its description, cargo, sea-route, speed, armament against submarines, make-up of its crew and its destination is known to the submarines lying in wait off the Spanish coast. This information is transmitted to the submarines by signals or by wireless and it is so accurate that a German agent can say to a ship captain "your vessel will be sunk at such and such a time." And these predictions are nearly always confirmed by facts. Other vessels, which pass the tests of the agents are spared, the paper says, and continues: "The German organization is very vast and admirably disposed to take advantage of all the elements at its disposition. Of the

60,000 to 80,000 Germans now in Spain, most part are the officers of the German army, marines, inventors, industrial workers, commercial agents and technicians of all sorts who have sought employment on all parts of the Spanish coast. In some instances they work for the lowest wages. This German army is directed by the consuls and heads of big German enterprises, commercial and industrial, organized before the war. They have created friendships everywhere, especially among the provincial authorities, the military chiefs, the commandants of marines, the officers of the civil guard, the carabinieri, the chiefs of public service among which are the posts and telegraph and the civil police. This has given birth to a system of espionage, sagely and methodically organized, which acquaints the Germans with most mathematical and precise information for their submarine campaign.
