

Two Thermos Bottles For Feeding Baby

Use two bottles, one to keep the milk clean, cool and free from bacteria, and the other for the hot water which is needed in reducing the milk. At feeding time mix the cold milk with the hot water until the milk is warmed to correct temperature.

A Thermos Bottle is also valuable for the picnic, for the fisherman, for the hunter, for the old folks, for the workmen, for the children at school.

Prices \$1.50 to \$4.50
