Mother Nature Mellows It.

An Unbeatable Team: Time and Nature

When tobacco manufacturers try to substitute hurry-up curing methods for slow, natural ageing of tobacco, you smokers pay the price.

There is no better method of bringing out the mellowness and mildness of "Kentucky's best" than two years natural ageing in wooden hogsheads.

VELVET is Kentucky's best Burley tobacco aged by Nature's method, the patient method, the expensive method, but the best method known to man.

Think about that over a pipe of VELVET.

Leggett & Myers Tobacco Co.

There ain't a whole lot of difference between a ripe persimmon an' a nearly ripe one—on the outside. Some of these nearly matured tobaccos sorter favor VELVET in looks.

Squatty Mine Locomotive Works In Low Drifts.

To meet conditions in a certain coal mine whose galleries are very low, a special electric locomotive which extends only 26 in. above the rails has been built. It is fitted with two trolley poles, one on each side, and a 300 foot reel of cable that is employed in passages too low to permit overhead conductors to be strung safely. The free end of this insulated line is supplied with a hook which the operator slips over the trolley wire in one of the main levels when he is about to enter a small side drift. As the locomotive proceeds the reel unwinds. When the direction is reversed and the distance retraced, the reel winds automatically, recoiling the cable rapidly, so that it does not slacken enough to cause interference. A picture of the locomotive appears in the April Popular Mechanics Magazine.

alfalfa and the yield has been as high as eight tons to the acre.

The O.-W. R. & N. was a pioneer in this movement.

"What's your dog's name, sonny?"
"Ginger."
"Does Ginger bite?"
"Naw! Ginger snaps."

Deafness Cannot Be Cured

by local applications, as they cannot reach the diseased portion of the ear. There is only one way to cure deafness, and that is by constitutional remedies. Deafness is caused by an inflamed condition of the mucous lining of the Eustachian Tube. When this tube is inflamed you have a rumbling sound or imperfect hearing, and when it is entirely closed, deafness is the result, and unless the inflammation can be taken out and this tube restored to its normal condition, hearing will be destroyed forever; nine cases out of ten are caused by Catarrh, which is nothing but an inflamed condition of the mucous surfaces.

We will give One Hundred Dollars for any case of Deafness (caused by catarrh) that cannot be cured by Hall's Catarrh Cure. Send for circular, free.

Take Hall's Family Pills for constipation.

Farmers Till Railroad's Right Of Way.

A very practical conservation movement has been undertaken by the Chicago, Burlington & Quincy Railroad by inducing farmers along its right of way to cultivate the railroad's land & joining their farms. According to the April Popular Mechanics Magazine, over 600 country dwellers took advantage of this plan last year, paying the nominal fee of \$5, which entitles them to utilize the land for an indefinite period.

This soil, which is usually very rich because so long untilled, is planted to

SIX THOUSAND CHILDREN TO HONOR MEMORY

New York, April 3.—(United Press)—The kiddies and the birds are going to have a big day May 5. That is the day many governors have set aside as Bird Day in the schools. Just 137 years ago that day was born John James Audobon, whose name now means bird protection. There are 650,000 American boys and girls, helpers of the Audobon societies in protecting the birds, who will take part in the celebration. They are full fledged members and are known as Juniors. Each child paying a dime gets a membership badge and beautifully colored pictures of birds so they can recognize their feathered friends. Thousands of new youngsters are expected to join the societies between now and May 5. Teachers are organizing them throughout the country, simply by sending their names to Gilbert Pearson, general secretary, 1974 Broadway, New York. Some of the governors are taking an interest in the celebration which may lead to a National Bird Day in '18.

Will Benefit Elgin.

A majority of Elgin business men believe that the motor car service will benefit Elgin in a business way, but if benefits are to accrue the business heads of the town must be alive to the opportunity and go out after the business. A little more advertising, a little more "pep", more attractive stores, courteous clerks and good goods are things to be considered.—Elgin Recorder.

The Increased Rates

The railroads are asking for higher rates to meet increased expenses on account of the Adamson law. The country will not object to paying these increased rates if it is shown they are necessary. But first it would like to know if the roads will provide sufficient rolling stock to do the work offered them if they get this increased revenue? It should also make it a condition precedent that the roads agree to handle such business as was offered them. The raising of rates without this should not be even considered.—Salem Capital Journal.

Conductor Is Veteran.

Baker, Ore., April 3.—(Special)—Signifying that he has served 26 years as conductor, David W. E. Baird, who is known to everyone who has occasion to use the Sumpter Valley railroad, is wearing four gold bands on his coat sleeve, one for each five years. He has been on the Sumpter Valley during his entire service as conductor, coming to Baker 22 years ago from Ogden, when, as he says, there wasn't much here to boast about.

THIS BUTTERFLY.

Exquisite in its simplicity is this evening gown of black velvet draped with a spangled net. Callot is securing butterflies to her frocks as her hallmark, so this gown has a rhinestone butterfly on the corsage. The sunburst of rhinestones graces the train.

What This Year's Hats Will Be Like

In the April Woman's Home Companion Grace Margaret Gould says: "This season the hats have but little trimming.

"Ostrich feathers, big ribbon bows and quantities of flowers are not used. "Trimnings consist of just a few tiny flowers, a single feather ornament, a narrow ribbon band with a tailored bow or contrasting straw effectively used.

"Colors—well, they are almost anything one could wish, but mostly bright to give an extra gray note to the outfit, if that is possible in these days of bright costumes.

"And this is a combination season. Straw and felt, straw and silks, transparent materials, straw trimmed—anything that is different."

Volunteers at The Dalles.

The Dalles, April 3.—(Special)—A company of volunteers may be raised here. A patriotic parade was held here Sunday.

More Milk Cuts Table Bills

One keen La Grande lady with several children has recently put into practical use the theory that all experts have come to recognize, namely, that wholesome milk is just the thing to cut high cost of living.

This particular lady buys twice the amount of milk she used to, but the saving on other foods is greatly in excess of the added milk bill.

Then, too, her family is consuming a more wholesome foodstuff than before.

Every housewife in La Grande is urged to work out the same savings for herself. The P. M. & C. company will explain just who and why the saving results.
