Livestock Receipts In Portland Market

Portland, Ore., July 14.—(Special)—The receipts at the Portland Union stock yards yesterday were fairly good for the last of the week, having about 100 cattle, 650 hogs and 850 sheep.

Cattle Prices continued steady with a demand that just about balanced the supply and with very few buyers in sight. Old prices are still current as indicated below, except that there are some signs of a growing strength in common stuff, stockers and canners.

Table with livestock prices: Best beef steers \$9.00@9.50, Good beef steers 8.25@8.75, Good cows 7.00@7.75, Ordinary 5.50@6.00, Calves 6.00@9.50, Bulls & Feeders 5.00@7.00, 6.00@7.50.

Hogs The hog market suffered a slight shock yesterday when the best load in the yards went out for \$15.65 which was probably 10 cents lower than they should have brought Thursday.

Sheep The supply continues to increase, but the demand seems to come along apace, and Monday's prices are still holding firm. The market is quoted as steady at the following prices:

Table with sheep prices: Yearlings \$9.50@10.25, Wethers 7.00@9.00, Ewes 3.50@7.00, Lambs 12.25@12.50.

EXPERT ADVISES TO BUY TRUCKS EARLY

Goodrich Man Discusses Effect of War on Motor Truck Industry Before Chicago Conference.

"Order your motor trucks early" was the keynote of an address delivered by S. V. Norton, Goodrich Truck Tire Sales Manager, of the B. F. Goodrich Rubber company to the Truck Owners conference held in Chicago last week.

After showing how great the foreign demand for American motor trucks had added a tremendous impetus to the industry in the United States during the past three years he emphasized the fact that our own Government's entry into the war would create a corresponding demand for trucks and drivers.

"Motor trucks are already competing successfully with railroads in a great many instances so that the demand for them will not be confined entirely to our government requirements," said Mr. Norton. "It is certain that 75,000 trucks will be necessary for the first big American expeditionary force. The supplying of these trucks to the government will be confined to those manufacturers whose construction and design conform to government specifications and these manufacturers will be guaranteed prompt delivery of parts and raw materials by the War Department."

"It is not impossible that older men and possibly women may be needed to replace experienced truck drivers who will be needed for government service and in the truck manufacturer's sales organizations older salesmen will be needed to take the place of the younger men who enter the government service. All of these conditions tend to prove that the motor truck business is destined for a generous expansion rather than depression and my advice to prospective purchasers of trucks is to buy them while they are available."

F. A. Epling leaves Monday morning for Kentucky where he will join his wife and visit relatives. He received word today that two of his younger brothers had joined the army and he will visit them before they leave.

illustration of what is meant by the three per cent grade encountered on its lines over the Siskiyou mountains on the Shasta Route: A passenger on the rear platform of a train of ten cars, each seventy feet long, may look ahead and behold the engineer seated in his cab from 20 to 25 feet higher than the passenger. At the same time, the bottom of the locomotive's driving wheels will be from six to eight feet higher than the top of the last car in which the passenger is seated. This is accomplished by the fact that the passenger and the engineer are over 700 feet apart, and there is a three foot rise in every hundred.
