Bumps Into Mr. Dunn's Car.

While C. S. Dunn was returning from a fishing trip Monday, just beyond Elgin a machine was coming behind his car, and the driver of the other machine lost control of the driving apparatus, and before Mr. Dunn could get out of the way, bumped into the rear of Mr. Dunn's car. No one was hurt, and no serious damage done to either car. Mr. Dunn says he did not learn the man's name or where he was from, and that the last he saw of him or his car was in an Elgin garage.

PORTLAND MARKET LETTER

August 15, 1917.

While the shipments were not large there was considerable show of activity on the livestock market in all departments today, reaching a climax in the hog alleys where the buyers faced a sharp decline.

Cattle

About 250 cattle were in the yards presenting little or no packing material. A large herd of dairy stock and a considerable string of feeders passed hands at current prices. No change in quotations have been submitted but general conditions, while quoted steady, indicate activity.

Hogs

The hog market is especially strong today with a raise of 50c in the early hours of trading which resulted in the following quotations for the day: Prime light 16.65 16.75; Prime heavies 16.50 16.65; pigs 14.75 15.25; Bulk of hogs sold at 16.75.

Sheep

500 sheep were delivered to the houses this morning and practically everything that was offered went over the scales at top prices, and real sales. The sheep market is considered strong and points upward.

Goats

Goats—\$3.25 and \$6.50. Spring lambs—\$11.00.

Directions For Canning

Fruits Without Sugar

The use of sugar, of course, is desirable in the canning of all kinds of fruits and makes a better and ready sweetened product. Moreover, most of the fruits when canned in water alone do not retain their natural flavor, texture and color as well as fruit put up in sirup. Fruit canned without sugar to be used for sauces or desserts must be sweetened.

Can the product the same day it is picked. Cut, stem or seed and clean the fruit by placing it in a strainer and pouring water over it until it is clean. Pack the product thoroughly in glass jars or tin cans until they are full. Use the handle of a tablespoon, wooden ladle or table knife for packing purposes. Pour over the fruit boiling water from a kettle, place rubbers and caps in position, partially seal if using glass jars; seal completely if using tin cans. Place the containers in a sterilizing vat, such as a wash boiler with false bottom or other receptacle improvised for the purpose. If using a hot water bath outfit, process for thirty minutes. Count time after the water has reached the boiling point. The water must cover the highest jar in container. After sterilizing remove packs, seal glass jars, wrap in paper to prevent bleaching and store in a dry, cool place.

If you are canning in tin cans it will improve the product to plunge the cans quickly into cold water immediately after sterilization. When using a steam pressure canner instead of the hot water bath sterilize for ten minutes with five pounds of steam pressure. Never allow the pressure to go over ten pounds.

A Cooking Hint.

The quality and flavor of meat or fish can be injured by overcooking or improper cooking. If fats are allowed to burn even a little they develop unpleasant flavors. If this happens in making gravies and sauces or in frying foods the food will usually not be eaten. Burned meat is also disagreeable, and so are burned vegetables.
