"The Signal System"

Read the advertisement of Hammermill Bond in the Saturday Evening Post:

"HERE'S ANOTHER IDEA WE CAN USE, SIMPSON"

"That makes the fifth we got out of that 'Signal System,' doesn't it? 'Yes, sir, and every last one of them is going to save time and money—and a lot of annoying details.' The big idea of 'The Signal System' is instant and certain recognition of every office form by having each one printed on paper of an identifying color. In helping many business firms to standardize their office forms, we have hit upon some very valuable time- and money-saving forms. You will find the actual forms in 'The Signal System.' When you standardize your office, inter-office and branch forms, you will find that Hammermill Bond fits naturally into such a scheme. It is tough and durable it is economical, it has fine, clean appearance, and is made in 12 colors and white, and is made in three finishes which produce a smooth, a ripple and a linen surface. You can get it quickly, too. Ask your printer about Hammermill Bond, and write for 'The Signal System' today. HAMMERMILL PAPER COMPANY ERIE, PA.

And then phone for or call at The Observer and see samples of this Fine Business Stationery—for Merchants, Doctors, Lawyers, Banks, and all who like Neat Stationery, such as The Observer Prints.

Mysterious Hush Boats Are Beating Submarine

(By United Press.) LONDON, Aug. 25.—(By Mail.)—Not until Germany has been floored for the 10-count, will the world have a peep at the mysterious odd-shaped fighters that are beating the submarine today. In England they are referred to vaguely as "mystery-ships" and "hush-boats." Imaginative people give them fantastic shapes and endow them with powers beyond the dreams of the greatest naval designers. So perhaps the land-faring folk will be disappointed when it's all over and the hush-boats come out of the haze to be looked at by seaport visitors. Privileged visitors to the great Naval bases are extremely reticent about the hush-boats. For weeks the newspapers have been hinting about something they know but have crossed their hearts not to tell—something about the new and mysterious sea-rowdies which despise naval footwork but prefer to rush in headlong and scrap it out with the U-boat till one or the other goes down.

The mystery-ship ranks with the tank as a feat of invention and construction according to the jealous guardians of the secret.

King George inspected two new types of vessels during his June visit to the grand fleet. They were in a class of their own and the class was never mentioned to the public.

Sea monsters, mystery-ships, hush-boats—they account for some of the high honors recently conferred on naval officers.
