DELEWARE RIVER CALLED "THE CLYDE OF AMERICA"

(By United Press.)

PHILADELPHIA, Sept. 19.—The Clyde of America. This is the title being rapidly acquired by the Delaware River. With the completion of additions being made to present shipyards and the swinging into operation of two great new plants now under construction, the Delaware will lead the world as a shipbuilding center. The biggest shipyard in the world is being built by the Government's Emergency Fleet Corporation on a 900-acre site below this city. There by the beginning of 1918, 15,000 men will be at work night and day, on 50 ships of from 5000 to 7500 tons each. As soon as these are launched another 50 will be begun.

Interests controlled by W. Averill Harriman, son of the late E. H. Harriman, have just begun work on a new yard at Bristol, Pa., 23 miles above Philadelphia, where ships to fill a Government order for 40 vessels of 9000 tons each will be built. Meantime the established shipyards, already rushing to complete ships which have been commandeered by the Government, have plans under for enlargements which will vastly increase their capacity.

People Speak Well of Chamberlain's Tablets.

"I have been selling Chamberlain's Tablets for about two years and hear such good reports from my customers that I concluded to give them a trial myself, and can say that I do not believe there is another preparation of the kind equal to them," writes G. A. McBride, Headford, Ont. If you are troubled with indigestion or constipation give them a trial. They will do you good.

Experience the Best Teacher.

It is generally admitted that experience is the best teacher, but should we not make use of the experience of others as well as our own? The experience of a thousand persons is more to be depended upon than that of one individual. Many thousands of persons have used Chamberlain's Cough Remedy for coughs and colds with the best results, which shows it to be a thoroughly reliable preparation for those diseases. Try it. It is prompt and effectual and pleasant to take.

SAMSON TRACTORS

SEEK GRIP

SAMSON SIEVE-GRIPS IN A CLASS BY THEMSELVES.

Original ideas developed through experience and necessity are embodied in Samson Sieve-Grip Tractors. You will find features there not thought of by others.

Recently we have secured letters patent on the method of connecting the air breather of a gas engine crank case to our patented NODUST-MOISTO-RIZER. This will be another exclusive feature in Samson Sieve-Grip Tractors, or otherwise an infringement if used by others.

The close connection of our management, being direct in touch with the actual operation, wants and requirements proving to be necessary in the small size farm tractor, we attribute largely to the success of the Samson Sieve-Grip.

It is our aim to manufacture a one hundred per cent efficiency tractor, sold at a right price, and give service that secures satisfied customers.
