

TWO FRENCH TOWNS WANT NAME OF LAFAYETTE

Paris, Sept. 10.—(By Mail.)—The name of Lafayette has been the bone of contention of two townships in the Haute-Loire department. The town of Le Puy-en-Velay, which has played a certain role in French history, as the birthplace of several well-known men, including a pope, has been advocating changing its name to that of Le Puy-Lafayette, in honor of the general whose old home is not far off.

But the town of Brioude has taken exception. During a recent session the municipal council decreed that, in as much as the Chateau of Chavanac, Lafayette's birthplace, was in the parish of Brioude, and that several of his family resided in the town, where the general was wont to come every year for the local fete, the name of Lafayette belonged by right to

Brioude and should not be by Le-Puy.

BLACK SMOKE IS WASTE FUEL

The United States Government analysis of the various soft coals used in the West show that same contains an average of 40 per cent volatile—Volatile in coal is the smoke and gases and is the first element released from coal when burning same. This black smoke and gas in the ordinary stove escapes unconsumed through the smoke pipe and chimney.

Tests have proven the volatile in coal when burned before escaping through chimney contains the same percentage of heat units as the carbon in coal.

The Air Blast Universal

With its new and novel construction supplies an abundance of superheated air directly over the fuel chamber, thereby burning and consuming all the smoke and gases and assuring one hundred percent heating efficiency—This overdraft of heated air also baffles the heat (preventing its usual free escape through smoke pipe) and deflects the heat to the floor.

Solve the fuel problem for all time and conserve your fuel.

The Air Blast Universal burns any grade of coal and wood.

Any stove will heat the ceiling.

The Air Blast Universal heats the floor as well.
